   Introduction to Parallel Algorithms and Architectures Frank Thomson Leighton,1992 Mathematics of Computing Parallelism   **Introduction to Parallel Algorithms and Architectures** F. Thomson Leighton,2014-05-12 Introduction to Parallel Algorithms and Architectures Arrays Trees Hypercubes provides an introduction to the expanding field of parallel algorithms and architectures This book focuses on parallel computation involving the most popular network architectures namely arrays trees hypercubes and some closely related networks Organized into three chapters this book begins with an overview of the simplest architectures of arrays and trees This text then presents the structures and relationships between the dominant network architectures as well as the most efficient parallel algorithms for a wide variety of problems Other chapters focus on fundamental results and techniques and on rigorous analysis of algorithmic performance This book discusses as well a hybrid of network architecture based on arrays and trees called the mesh of trees The final chapter deals with the most important properties of hypercubes This book is a valuable resource for readers with a general technical background   **Algorithms and Computations** John Staples,1995-11-15 This book presents the refereed proceedings of the 6th International Symposium on Algorithms and Computation ISAAC 95 held in Cairns Australia in December 1995 The 45 revised full papers presented together with the abstracts of three invited talks were selected from a total of 130 submissions The papers address many current aspects of research and advanced applications of algorithms and computations among the topics covered are graph theory and graph algorithms computational geometry computational logics searching and sorting approximation and optimization algebraic manipulation and coding   *Algorithms and Theory of Computation Handbook, Volume 2* Mikhail J. Atallah,Marina Blanton,2009-11-20 Algorithms and Theory of Computation Handbook Second Edition Special Topics and Techniques provides an up to date compendium of fundamental computer science topics and techniques It also illustrates how the topics and techniques come together to deliver efficient solutions to important practical problems Along with updating and revising many of   **Soft Computing and Intelligent Systems** Madan M. Gupta,1999-10-28 The field of soft computing is emerging from the cutting edge research over the last ten years devoted to fuzzy engineering and genetic algorithms The subject is being called soft computing and computational intelligence With acceptance of the research fundamentals in these important areas the field is expanding into direct applications through engineering and systems science This book cover the fundamentals of this emerging filed as well as direct applications and case studies There is a need for practicing engineers computer scientists and system scientists to directly apply fuzzy engineering into a wide array of devices and systems   **Handbook of Computational Geometry** J.R. Sack,J. Urrutia,1999-12-13 Computational Geometry is an area that provides solutions to geometric problems which arise in applications including Geographic Information Systems Robotics and Computer Graphics This Handbook provides an overview of key concepts and results in Computational Geometry It may serve as a reference and study guide to the field Not

only the most advanced methods or solutions are described but also many alternate ways of looking at problems and how to solve them   Handbook of Nature-Inspired and Innovative Computing Albert Y. Zomaya,2006-03-23 As computing devices proliferate demand increases for an understanding of emerging computing paradigms and models based on natural phenomena Neural networks evolution based models quantum computing and DNA based computing and simulations are all a necessary part of modern computing analysis and systems development Vast literature exists on these new paradigms and their implications for a wide array of applications This comprehensive handbook the first of its kind to address the connection between nature inspired and traditional computational paradigms is a repository of case studies dealing with different problems in computing and solutions to these problems based on nature inspired paradigms The Handbook of Nature Inspired and Innovative Computing Integrating Classical Models with Emerging Technologies is an essential compilation of models methods and algorithms for researchers professionals and advanced level students working in all areas of computer science IT biocomputing and network engineering   *Advances in Computer Systems Architecture* Thambipillai Srikanthan,Jingling Xue,Chip-Hong Chang,2005-10-19 On behalf of the ProgramCommittee we are pleased to present the proceedings of the 2005 Asia Paci c Computer Systems Architecture Conference ACSAC 2005 held in the beautiful and dynamic country of Singapore This conference was the tenth in its series one of the leading forums for sharing the emerging research ndings in this eld In consultation with the ACSAC Steering Committee we selected a member Program Committee This Program Committee represented a broad spectrum of research expertise to ensure a good balance of research areas stitutions and experience while maintaining the high quality of this conference series This year s committee was of the same size as last year but had 19 new faces We received a total of 173 submissions which is 14% more than last year Each paper was assigned to at least three and in some cases four ProgramC mittee members for review Wherever necessary the committee members called upon the expertise of their colleagues to ensure the highest possible quality in the reviewing process As a result we received 415 reviews from the Program Committee members and their 105 co reviewers whose names are acknowledged inthe proceedings Theconferencecommitteeadopteda systematicblind review process to provide a fair assessment of all submissions In the end we accepted 65 papers on a broad range of topics giving an acceptance rate of 37 5% We are grateful to all the Program Committee members and the co reviewers for their e orts in completing the reviews within a tight schedule   **Introduction to Parallel Algorithms & Architecture** Frank Thomson Leighton,1992   Algorithms and Computation ,1995   SIAM Journal on Computing Society for Industrial and Applied Mathematics,1997   **Fundamenta Informaticae** Polskie Towarzystwo Matematyczne,2003   **Cornell University Courses of Study** Cornell University,1995   **Proceedings** ,2002   **Routing, Deadlock Avoidance and Communication Paradigms for Starcake and K-ary N-clique Networks** Gebre Ammanuel Gessesse,1997   Graph-theoretic Concepts in Computer Science ,2003   **Proceedings of the ...ACM Symposium on Theory of Computing** ,2003   **Proceedings of the**
