Noëlle van der Waag-Cowling,Louise Leenen,2019-02-28 *Research Anthology on Business Aspects of Cybersecurity* Management Association, Information Resources,2021-10-29 Cybersecurity is vital for all businesses regardless of sector With constant threats and potential online dangers businesses must remain aware of the current research and information available to them in order to protect themselves and their employees Maintaining tight cybersecurity can be difficult for businesses as there are so many moving parts to contend with but remaining vigilant and having protective measures and training in place is essential for a successful company The Research Anthology on Business Aspects of Cybersecurity considers all emerging aspects of cybersecurity in the business sector including frameworks models best practices and

emerging areas of interest This comprehensive reference source is split into three sections with the first discussing audits and risk assessments that businesses can conduct to ensure the security of their systems The second section covers training and awareness initiatives for staff that promotes a security culture The final section discusses software and systems that can be used to secure and manage cybersecurity threats Covering topics such as audit models security behavior and insider threats it is ideal for businesses business professionals managers security analysts IT specialists executives academicians researchers computer engineers graduate students and practitioners

### **Human Rights, Digital Society and the Law**

Mart Susi,2019-05-31 The Internet has created a formidable challenge for human rights law and practice worldwide International scholarly and policy oriented communities have so far established a consensus regarding only one main aspect human rights in the internet are the same as offline There are emerging and ongoing debates regarding not only the standards and methods to be used for achieving the sameness of rights online but also whether classical human rights as we know them are contested by the online environment The internet itself in view of its cross border nature and its ability to affect various areas of law requires adopting an internationally oriented approach and a perspective strongly focused on social sciences In particular the rise of the internet enhanced also by the influence of new technologies such as algorithms and intelligent artificial systems has influenced individuals civil political and social rights not only in the digital world but also in the atomic realm As the coming of the internet calls into question well established legal categories a broader perspective than the domestic one is necessary to investigate this phenomenon This book explores the main fundamental issues and practical dimensions related to the safeguarding of human rights in the internet which are at the focus of current academic debates It provides a comprehensive analysis with a forward looking perspective of bringing order into the somewhat chaotic online dimension of human rights It addresses the matter of private digital censorship the apparent inefficiency of existing judicial systems to react to human rights violations online the uncertainty of liability for online human rights violations whether the concern with personal data protection overshadows multiple other human rights issues online and will be of value to those interested in human rights law and legal regulation of the internet

### **Cybersecurity Policy in the EU and South Korea from Consultation to Action**

Gertjan Boulet,Michael Reiterer,Ramon Pacheco Pardo,2022-12-08 This book offers a very interesting deep dive into EU and South Korean approaches to cybersecurity issues In a unique approach the editors and authors focus on the potential for strategic partnership and shared lessons learned given common commitments to democracy human rights the free market and a rules based international order of the two regions Essential reading for students and researchers in political science international relations international law strategic and defence studies computer science and cognitive science
