The series presents focused treatments of emerging technologies including Java C, NET, web services, Internet, and web development, and more. PRE-PUBLICATION REVIEWER TESTIMONIALS: Presenting software engineering side-by-side with core Java concepts is highly refreshing; gives readers insight into how professional software is developed. Clark Richey, Java Champion, RABA Technologies, LLC: The quality of the design and code examples is second to none. Terrell Hull, Enterprise Architect: The JDBC chapter is very hands-on. I like the fact that Java DB Apache Derby is used in the examples, which makes it really simple to learn and understand JDBC. Sandeep Konchady, Sun Microsystems: Equips you with the latest web application technologies. Examples are impressive and real. Want to develop a simple address locator with Ajax and JSF? Jump to Chapter 22. Vadiraj Deshpande, Sun Microsystems: Covers web services with Java SE 6 and Java EE 5 in a real-life, example-based, friendly approach. The Deitel Web Services Resource Center is really good, even for advanced developers. Sanjay Dhamankar, Sun Microsystems: Mandatory book for any serious Java EE developer looking for improved productivity. JSF development, visual web development, and web services development have never been easier. Ludovic Chapenois, Sun Microsystems: I teach Java programming and object-oriented analysis and design. The OOD/UML 2 case study is the best presentation of the ATM example I have seen. Craig W. Slinkman, University of Texas at Arlington: Introduces OOP and UML 2 early. The conceptual level is perfect. No other book comes close to its quality of organization and presentation. The live code approach to presenting exemplary code makes a big difference in the learning outcome.
