

Gradient concept

In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the handle along the path to create a blue-to-purple gradient, which can then be moved along the gradient path.

With a gradient applied, you can adjust the color and the position of the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

An alternative to an address bar is working with gradients directly on the object. There is a **Gradients** editor available from the **Color** window on the toolbar. This editor gives you high precision drag positioning as well as a few additional options.

You can work with **Elliptical** and **Radial** gradients in Adobe Photoshop. To create a radial gradient, use the **Type** pop-up menu on the top toolbar. Gradients are available on the **Color** & Transparency window.
