The Residential Pathway Jane Forsyth, 2025-05-28 *The Residential Pathway APC Essentials* was written to facilitate and encourage candidates preparing for the RICS Assessment of Professional Competence APC to become Chartered Surveyors. This book will help candidates, their Counsellors and supervisors to understand the requirements of the Residential pathway. The detail of the technical competencies, How to select suitable competencies, How to demonstrate the required knowledge and experience and How to succeed in the final interview. It will also be a useful reference for AssocRICS candidates and qualified professionals. This concise book has clear headings to guide readers with bullet point checklists and signposting to key themes and important sources for further reading. It alerts readers to the need to be aware of changes and developments in the residential sector and to the wider economic, social and political factors that influence it. This book includes lists of relevant RICS and other professional publications, the laws and regulations that frame professional surveying practice and example written submissions for the technical competencies at each level. It will help to motivate and reassure candidates, giving them confidence to recognise the value and relevance of their knowledge and practical experience and to understand how to best apply this to demonstrate their professional competence.

BIM and Big Data for Construction Cost Management Weisheng Lu, Chi Cheung Lai, Tung Tse, 2018-10-11. This book is designed to help practitioners and students in a wide range of construction project management professions to understand what building information modelling (BIM) and big data could mean for them and how they should prepare to work successfully on BIM compliant projects and maintain their competencies in this essential and expanding area. In this book, the state of the art information technologies that support high profile BIM implementation are introduced and case studies show how BIM has integrated core quantity surveying and cost management responsibilities and how big data can enable informed decision making for cost control and cost planning. The authors' combined professional and academic experience demonstrates with practical examples the importance of using BIM and particularly the fusion of BIM and big data to sharpen competitiveness in global and domestic markets. This book is a highly valuable guide for people in a wide range of construction project management and quantity surveying roles. In addition, implications for project management, facilities management, contract administration and dispute resolution are also explored through the case studies, making this book essential reading for built environment and engineering professionals.
