

Introduction to Economics Study Guide

- Define **economics**. Explain how economics applies to the real world.
 - **Economics** is a social science that studies how individuals, governments, firms, and nations make choices on allocating scarce resources to satisfy their unlimited wants. Economics tells us how to make the best use of our scarce resources and is usually divided into two categories: Microeconomics and macroeconomics
- Define **opportunity cost**. Identify the opportunity cost of various decisions made by individuals and societies.
 - **Opportunity cost** is the cost of an alternative that must be forgone to pursue a certain action. Put another way, the benefits you could have received by taking an alternative action.

 - **Positive economics** is objective and fact-based, while **normative economics** is subjective and value-based. Positive economic statements do not have to be correct, but they must be able to be tested and proved or disproved. Normative economic statements are opinion based, so they cannot be proved or disproved.
- Contrast microeconomics and macroeconomics. Give examples of questions each tries to answer.
 - **Microeconomics** deals with an economist on the small scale (ex. individuals)
