Is Japanese Related to Korean, Tungusic, Mongolic and Turkic? Martine Irma Robbeets, 2005 Where does Japanese come from The linguistic origin of the Japanese language is among the most disputed questions of language history One current hypothesis is that Japanese is an Altaic language sharing a common ancestor with Korean Tungusic Mongolic and Turkic But the opinions are strongly polarized Especially the inclusion of Japanese into this classification model is very much under debate Given the lack of consensus in the field this book presents a state of the art for the etymological evidence relating Japanese to Korean Tungusic Mongolic and Turkic The different Altaic etymologies proposed in the scholarly literature are gathered in an etymological index of Japanese appended to this book An item by item sifting of the evidence helps to hold down borrowings universal similarities and coincidental look alike to a small percentage When the remaining core evidence is screened in terms of phonological regularity the answer to the intriguing question is beginning to take shape
