Progress of the Personal Income Tax in Emerging and Developing Countries Ms. Dora Benedek,Juan Carlos Benitez,Charles Vellutini,2022-01-28 Personal Income Tax PIT is one of the key sources of revenues in Advanced Economies AEs but plays a much more limited role in Low Income Developing Countries LIDCs and Emerging Market Economies EMEs both in terms of revenue and redistributive impact Notwithstanding this paper shows that LIDCs and EMEs increased their PIT to GDP revenue by 110 and 48 percent respectively during the 1990-2019 period a marked improvement in the PIT revenue performance We find that this rise was driven primarily by economic developments and to a lesser extent by changes in the design of PIT systems We also find that LIDCs that improved their tax to GDP ratios relied on a broader set of tax instruments and not exclusively on the PIT suggesting that a successful revenue mobilization strategy of developing countries requires a comprehensive approach covering a wider range of taxes Finally using a newly assembled dataset of PIT characteristics of 157 countries over the 2006-2018 period we estimate a

novel redistribution index of the PIT in LIDCs We show that the contribution of the PIT to inequality reductions has been significant

Unions Renewed Alice Martin, Annie Quick, 2020-09-29 Unions face a once in a generation opportunity for renewal Decades of decline have been compounded by a global elite who increasingly generate profit from financial engineering in ways that side step labour and undermine the power of organised workers However as this economic system begins to falter there are signs of a renewed union movement emerging Debt laden firms from supermarkets and nursery chains to outsourcing giants are collapsing and workers are organising to determine what comes next Unionised bank cashiers are refusing to push predatory loans teachers are striking against the exploitative housing market and manufacturing workers are pooling redundancy pay to buy out plants and become worker owners Alice Martin and Annie Quick argue that these are seeds of union renewal To be effective in an age of finance the union movement must set its ambitions beyond narrow wage bargaining and towards the financial systems that have infiltrated workplaces and impoverished communities By doing so they can play a critical role in ushering in a new democratic economy No one committed to economic justice can afford to miss this urgent highly original book and its radical vision for unions

Western Hemisphere Dept.,2017-05-19 With the global economy gaining some momentum economies of Latin America and the Caribbean are recovering from a recession at the regional level in 2016 This gradual improvement can be understood as tale of two adjustments external and fiscal that are ongoing in response to earlier shocks But headwinds from commodity terms of trade shocks and country specific domestic factors are fading paving the way for real GDP to grow by about 1 percent in 2017 Regional activity is expected to pick up further momentum in 2018 but at a slower pace than previously anticipated while medium term growth is projected to remain modest at about 2.6 percent The outlook is shaped by key shifts in the global economic and policy landscape where slow growth low productivity and high income inequality are creating pressure for a shift toward inward looking policies in some advanced economies Domestic fundamentals and developments however will continue to play a significant role in determining growth for the region At the same time risks to the outlook have widened in a setting of higher global

uncertainty In this challenging external context countries should aim for completing fiscal and external adjustments to preserve or rebuild policy buffers Charting a course toward higher sustainable and more equitable growth will also require strengthening structural reforms Specifically closing infrastructure gaps improving the business environment governance and education outcomes and encouraging female labor participation are necessary to boost medium term growth and foster income convergence Chapters in this report examine the ongoing external adjustment to terms of trade shifts drivers of capital flows to the region the role of the investor base and macroeconomic impact of migration and remittances

Parliamentary Debates India. Parliament. Rajya Sabha,2017-07 *Taiwan Statistical Data Book* ,2017 **Annual Report to the President of the Republic and Parliament by the Governor ...** Banque de France,2016 Regional Spillovers in Sub-Saharan Africa Francisco Arizala,Mr.Matthieu Bellon,Ms.Margaux MacDonald,Mr.Montfort Mlachila,Mustafa Yenice,2018-08-01 After close to two decades of strong economic activity overall growth in sub Saharan Africa decelerated markedly in 2015 16 as the largest economies experienced negative or flat growth Regional growth started recovering in 2017 but the question remains of how trends in the economies stuck in low gear will spill over to the countries that have maintained robust growth This note illuminates the discussion by identifying growth spillover channels The focus is on trade banking financial remittance investment fiscal and security channels which are the most prominent and most likely to transmit growth trends across borders In addition to bringing together findings from a broad array of existing research the note identifies countries that are the most likely sources of regional spillovers and those that are most likely to be impacted and provides estimates for the size of these channels It finds that intraregional trade and remittance flows are an important channel for growth spillovers while banking channels are less important but will remain a risk going forward Finally the note documents other important spillover channels through financial markets contagion revenue sharing arrangements in fiscal unions commodity pricing policies corporate investment and forced migration The main takeaway is that the level of interdependence among sub Saharan countries is higher than is generally assumed Consequently there is a need for additional emphasis on regional surveillance and spillover analysis along with traditional bilateral surveillance
