Empowering Civil Society in the Industrial Revolution 4.0 Sukowiyono, Siti Awaliyah, Peter Carey, Max Lane, Chen Fei, 2021-10-25 ICCEDI is an international seminar that is held every two years organized by the Law and Citizenship Department Faculty of Social Science Universitas Negeri Malang. The activities aim to discuss the theoretical and practical citizenship education that becomes needed for democracy in Indonesia and other countries with a view to build academic networks by gathering academics from various research institutes and universities. Citizenship education is an urgent need for the nation in order to build a civilized democracy for several reasons. Citizenship education is important for those who are politically illiterate and do not know how to work the democracy of its institutions. Another problem is the increasing political apathy indicated by the limited involvement of citizens in the political process. These conditions show how citizenship education becomes the means needed by a democratic country like Indonesia. The book addresses a number of important issues such as law issues, philosophy of moral values, political government, socio-cultural and Pancasila, and civic education. Finally, it offers a conceptual framework for future democracy. This book will be of interest to students, scholars, and practitioners, governance, and other related stakeholders.

Call to Freedom Sterling Stuckey, 2003 Teaches U.S. history employing the themes geography, economics, government, citizenship, science, technology, and society, culture, Constitutional heritage, and global relations.

A TEXTBOOK OF URBAN PLANNING AND GEOGRAPHY SHARMA, SAMEER, 2020-11-01. Generally, textbooks on urban geography and urban planning are based on ideas laid out in the west and are unable to explicitly connect those ideas to the way Indians experience their cities. This gap is addressed in this book by reconceptualising Indian urban studies. The reconceptualisation is done by dissecting western theories, concepts, paradigms, and principles and practices and placing them alongside how Indians experience their urban landscapes. Such a comparative analysis allows readers to break from their past understandings of the structure and dynamics of Indian cities as well as enable researchers to make exploratory hypotheses. The book will empower students to craft and implement new approaches unconstrained by orthodox theories and biases. Primarily intended for the students of Geography and Urban Planning, the book covers the evolution of urban structures and dynamics of settlements in India largely after India's Independence. There are seven chapters in the book. First three chapters describe and explain the evolution of Indian settlements up to the present. The next four chapters focus on regions, urban planning, urban governance, and the social landscape of Indian cities. Each chapter ends with a set of short and long answer questions.

KEY FEATURES Large coverage of the syllabi prescribed in Indian academic institutions. Strategically organised text of each chapter for the ease of learning. Abundant case studies in each chapter. Chapter end short answer, long answer, and fill in the blank type exercise problems. Target Audience: B Arch, BA B Sc Geography, MA M Sc Geography.
