A Visual History of Twentieth-century Architecture Dennis Sharp, 1972 The twentieth century has witnessed dramatic and

fundamental changes in almost every branch of architecture It has been a period of experiment in the use of new materials and constructional methods which has led to an extraordinarily wide range of buildings from highly personal and emotional structures to the cool geometry of pure forms This is the first book to attempt in strictly chronological terms to survey all the major buildings of this century It is arranged in decades from 1900 to 1970 within each decade all significant completed buildings which have had a generic influence on twentieth century architecture are examined Each entry is fully documented and the building's present state is given where known Each building is illustrated with photographs drawings and plans An introduction sets the scene looking back to the engineering achievements of the nineteenth century to the architects technical inheritance and the aesthetic problems that have occupied architects and theorists of this century Each decade is prefaced by a short evaluation of the developments within those years The buildings themselves are presented in clear factual terms and much hitherto unknown information is given In addition to the decade chapters the book provides a useful chronology of buildings erected between 1900 and 1970 and a comprehensive index It is illustrated with nearly 1 000 monochrome and colour illustrations The combination of background information with a large body of factual matter makes this book of exceptional value to anyone who is interested in the social and cultural life of the twentieth century To students and historians it will become an essential reference work from dust jacket

Inventions and Inventors Bridget Giles, 1999 Traces the history of inventions that shape our lives explaining how they worked then and now Inventions Richard PLATT, 1994 *The Technical Image* Horst Bredekamp, Vera Dünkel, Birgit Schneider, 2019-04-10 In science and technology the images used to depict ideas data and reactions can be as striking and explosive as the concepts and processes they embody both works of art and generative forces in their own right Drawing on a close dialogue between the histories of art science and technology *The Technical Image* explores these images not as mere illustrations or examples but as productive agents and distinctive multilayered elements of the process of generating knowledge Using beautifully reproduced visuals this book not only reveals how scientific images play a constructive role in shaping the findings and insights they illustrate but also however mechanical or detached from individual researchers choices their appearances may be how they come to embody the styles of a period a mindset a research collective or a device Opening with a set of key questions about artistic representation in science technology and medicine *The Technical Image* then investigates historical case studies focusing on specific images such as James Watson's models of genes drawings of Darwin's finches and images of early modern musical automata These case studies in turn are used to illustrate broad themes ranging from Digital Images to Objectivity and Evidence and to define and elaborate upon fundamental terms in the field Taken as a whole this collection will provide analytical tools for the interpretation and application of scientific and technological imagery **Small Inventions that Make a Big Difference**, 1984 A book on inventions inventors that covers such common items as the zipper **The Triumph of Invention** Trevor I.
