Mycotoxins In Food Detection And Control:

Mycotoxins in Food N. Magan, M. Olsen, 2004-07-26 Leading researchers in the field are discovering that mycotoxins pose a significant health risk in both animal feed and foods for human consumption. However, the pace of distributing current information on their findings has been lagging until now. With its distinguished editors and international team of contributors, *Mycotoxins in Food* summarizes the world's most recent research on how to assess the risks from mycotoxins, detect particular mycotoxins, and control them at differing stages in the supply chain. *Mycotoxins in Food* addresses risk assessment techniques, sampling methods, modeling, and detection techniques used to measure the risk of mycotoxin contamination. Current regulations governing mycotoxin limits in food are provided as well. The book includes chapters on the use of HACCP systems and mycotoxin control at different stages in the supply chain. Case studies demonstrate how these controls work for particular products. The last section details particular mycotoxins: ochratoxin A and patulin, zearalenone, and fumonisins. Assessing, detecting, and controlling mycotoxins is central to guaranteeing food safety. Therefore, it is important to understand the latest discoveries and data concerning these toxic compounds in order to limit animal and human exposure. This work is an authoritative reference for all those concerned with ensuring the safety of food.

Mycotoxins in Food and Feed Pradeep Kumar, Madhu Kamle, Dipendra Kumar Mahato, 2023-01-20 Mycotoxins represent an assorted range of secondary fungal metabolites that extensively occur in numerous food and feed ingredients at any stage during pre and post harvest conditions. Mycotoxin contamination in food and feed causes acute and chronic mycotoxicosis, including teratogenic, carcinogenic, oestrogenic, neurotoxic, and immunosuppressive effects, and several other health issues. *Mycotoxins in Food and Feed* presents an overview of all the major mycotoxins, sources of production, chemistry, and biosynthesis, occurrence in food and feed, effect on agriculture, effect on human health, detection technique, masked mycotoxins, and management and control strategies. Key Features: Provides broad coverage of mycotoxins and their effects on food and feed. Includes comprehensive information of occurrence, chemistry, detection methods, and management strategies for each toxin. Discusses the recent development in detection technologies for major mycotoxins. Explores agricultural practices and post-harvest management strategies for managing mycotoxin infestations. **Masked Mycotoxins in Food**

Chiara Dall'Asta, Franz Berthiller, 2015-11-05 The first book to cover this fast-developing field, *Masked Mycotoxins in Food* will provide a full overview of the issues relating to the toxicology of masked mycotoxins present in food products. Mycotoxins are naturally occurring chemicals produced by moulds that can grow on crops and foodstuffs. Masked mycotoxins are modified mycotoxins; due to this modification, many cannot be detected using standard analytical techniques, for example HPLC and ELISA, and further research is needed to understand the health risks and threats from these modified compounds. Masked mycotoxin research is an area of toxicological research that has gained significant interest and momentum in recent years. The aim of this book is to provide a full picture of the topic, from the masked mycotoxin formation in plants to their catabolic

fate in humans The book also provides new insights and will highlight possible gaps in the knowledge base of this relatively new area Edited and written by World renowned experts working within the field this book is of interest to toxicologists and biochemists but also food scientists and agricultural researchers working in industry and academia Instant Insights: Mycotoxin detection and control Prof. Naresh Magan,Dr Esther Garcia-Cela,Dr Carol Verheecke-Vaessen,Dr Angel Medina,Dr Zhao Jin,Prof Paul Schwarz,David Jordan,Rick Brandenburg,Gary Payne,David Hoisington,Nick Magnan,James Rhoads,Mumuni Abudulai,Koushik Adhikari,Jinru Chen,Richard Akromah,William Appaw,William Ellis,Maria Balota,Kumar Mallikarjunan,Emeritus Professor Ken Boote,Greg MacDonald,Kira Bowen,Boris Bravo-Ureta,Jeremy Jelliffe,Agnes Budu,Hendrix Chalwe,Alice Mweetwa,Munsanda Ngulube,Awere Dankyi,Brandford Mochia,Vivian Hoffmann,Amade Muitia,Agnes Mwangwela,Sam Njoroge,David Kalule Okello,Nelson Opoku,Mary A.
