Happiness Center Moaml Mohmmmed,2019-08-03 Happiness CenterHappiness is not for sale Why Rich People Really Aren t Happier Happy amnesia The ability to imagine to try to predict our future state of mind is what sets us apart from less evolved species It s also the very thing that stunts our shot at true happiness We assume that a sportier car a bigger house a better paying job or that dress will bring us joy because well they did in the past right Not really says Daniel Gilbert a Harvard psychology professor and the author of *Stumbling on Happiness* Research reveals that memory is less like a collection of photographs than it is like a collection of impressionist paintings rendered by an artist who takes considerable license with his subject Gilbert writes We forget that the new car high deflated well before our first trip to the mechanic and the raise came with stressful late nights at the office and a steeper tax tab Our appetite for self destruction What s so wrong with relishing and embellishing the good It s costly Faulty emotional recall makes us do dumb things with our money like buying cool new stuff that never quite satisfies In so many areas we know when enough is enough When we re healthy we don t strive for extreme health After a good meal we re sated we don t order another filet mignon to augment our satisfaction Yet our pause button shorts out when it comes to money The brief pick me up that accompanies a raise or windfall think of it like a caffeine buzz drives us to want more We get a raise spend it adapt to our improved circumstances and seek more money working up a sweat on what University of Southern California economist Richard Easterlin calls the hedonic treadmill But somehow the happy o meter stays in the same place or even slows down Consider that the average American is less satisfied with life today than we were in the 1950s yet we earn twice as much and yes that s adjusted for inflation No wonder they never crown a winner of the rat race How much is enough Absent total emotion recall and the ability to recognize when we ve hit our happy set point what will make us happy How s 50 000 a year sound That s the contentment calculation from a Roper ASW survey a few years ago Of course the amount is relative but consider what it represents to the average non Manhattan rent paying American It s enough to cover the bills and have some fun money left over After that each incremental move up the pay scale has less long term emotional impact A 20% raise won t make you 20% happier And in fact chasing that extra 10 grand might just make you miserable So the guy in the corner office may actually be more bummed out than those of us in the cheap seats Does that news bring a smile to your face If so it s OK with us
