AI and IA Ted Peters, 2019-09-01 Will advances in AI Artificial Intelligence or IA Intelligence Amplification lead to the extinction of the human race as we know it Or will superintelligence lead to utopia In this collection of thoughtful essays we must first get clear on the question is artificial intelligence actually intelligent or not Only with an affirmative answer could our techies proceed toward their goal the creation of a superintelligence that leads through transhumanism to a posthuman entity that would replace today s human Should today s moderately intelligent human species voluntarily go extinct to make way for a more intelligent species to succeed us in evolutionary history These scientific questions are addressed in this volume in light of their theological ethical and social implications

Is Law Computable? Simon Deakin, Christopher Markou, 2020-11-26 What does computable law mean for the autonomy authority and legitimacy of the legal system Are we witnessing a shift from Rule of Law to a new Rule of Technology Should we even build these things in the first place This unique volume collects original papers by a group of leading international scholars to address some of the fascinating questions raised by the encroachment of Artificial Intelligence AI into more aspects of legal process administration and culture Weighing near term benefits against the longer term and potentially path dependent implications of replacing human legal authority with computational systems this volume pushes back against the more uncritical accounts of AI in law and the eagerness of scholars governments and LegalTech developers to overlook the more fundamental and perhaps bigger picture ramifications of computable law With contributions by Simon Deakin Christopher Markou Mireille Hildebrandt Roger Brownsword Sylvie Delacroix Lyria Bennet Moses Ryan Abbott Jennifer Cobbe Lily Hands John Morison Alex Sarch and Dilan Thampapillai as well as a foreword from Frank Pasquale

Drohnen und ihre Verwendung im privaten Bereich. Welche Faktoren beeinflussen unsere Einstellung zu robotischen Systemen? Daniel Cavanaugh, 2019-07-05. Seit einigen Jahren stehen Drohnen im Zentrum leidenschaftlich geführter Debatten. Ihr Ursprung liegt in der militärischen Nutzung. Doch inzwischen eröffnen sie völlig neue Perspektiven in den verschiedensten Anwendungsbereichen. Wie verändert sich dabei die Einstellung zu Drohnen in unserer Gesellschaft? Daniel Cavanaugh erklärt in seiner Publikation zunächst, was genau eine Drohne überhaupt ist und welche Aufgaben die robotischen Systeme bereits übernehmen. Danach geht er auf verbreitete Befürchtungen im Zusammenhang mit Drohnen ein. Den Befragten ist vor allem eine einheitliche internationale Regelung wichtig. So sollen die Privatsphäre sowie die Kontrolle über Drohnen gewahrt bleiben. Außerdem fehlt eine deutliche Unterscheidung zwischen autonomen und nicht autonomen Drohnen. Cavanaugh zeigt, welche Faktoren die Einstellung potentieller Käufer und User gegenüber Drohnen im privaten und kommerziellen Gebrauch beeinflussen. Aus dem Inhalt: Künstliche Intelligenz, Robotik, Autonomie, Innovation, Artificial Intelligence.

Superintelligence Nick Bostrom, 2024-09-18. Que se passera-t-il quand les machines surpasseront l'intelligence humaine? Les robots vont-ils nous sauver ou nous détruire? Isaac Asimov l'avait dit en 1942 avec ses trois lois de la robotique: l'intelligence artificielle doit être contrôlée au plus profond de ses fondements pour qu'elle ne puisse jamais s'attaquer à l'homme. Mais comment s'assurer qu'une superintelligence ne se révélera pas hostile à la survie de l'humanité? Dans cet ouvrage unique, best-seller international traduit en 19 langues, Nick Bostrom nous révèle les difficultés que la recherche d'une intelligence supérieure va nous poser et comment les résoudre. Il s'agit sans doute du plus grand défi auquel l'humanité aura à faire face. Il faut s'y préparer.

Deep Utopia Nick Bostrom,2024-04-09 A greyhound catching the mechanical lure what would he actually do with it Has he given this any thought Bostrom s previous book Superintelligence Paths Dangers Strategies changed the global conversation on AI and became a New York Times bestseller It focused on what might happen if AI development goes wrong But what if things go right Suppose that we develop superintelligence safely govern it well and make good use of the cornucopian wealth and near magical technological powers that this technology can unlock If this transition to the machine intelligence era goes well human labor becomes obsolete We would thus enter a condition of post instrumentality in which our efforts are not needed for any practical purpose Furthermore at technological maturity human nature becomes entirely malleable Here we confront a challenge that is not technological but philosophical and spiritual In such a solved world what is the point of human existence What gives meaning to life What do we do all day Deep Utopia shines new light on these old questions and gives us glimpses of a different kind of existence which might be ours in the future
