Modern Projects and Experiments in Organic Chemistry Jerry R. Mohrig, 2003 The Manuals Modern Projects and Experiments in Organic Chemistry helps instructors turn their organic chemistry laboratories into places of discovery and critical thinking In addition to traditional experiments the manual offers a variety of inquiry based experiments and multi week projects giving students a better understanding of how lab work is actually accomplished Instead of simply following directions students learn how to investigate the experimental process itself The only difference between the two versions of the manual is that each is tailor to specific laboratory equipment Content wise they are identical The Program Modern Projects and Experiments in Organic Chemistry is designed to provide the utmost in quality content student accessibility and instructor flexibility The project consists of 1 A laboratory manual in two versions miniscale and standard taper microscale equipment miniscale and Williamson microscale equipment 2 Custom publishing option All experiments are available through Freeman s custom publishing service at Freeman Custom Publishing Instructors can use this service to create their own customized lab manual even including they own material 3 Techniques of the Organic Chemistry Laboratory This concise yet comprehensive companion volume provides students with detailed descriptions of important techniques Comprehensive Organic Chemistry Experiments for the Laboratory Classroom Carlos A M Afonso, Nuno R Candeias, Dulce Pereira Simão, Alexandre F Trindade, Jaime A S Coelho, Bin Tan, Robert Franzén, 2020-08-28 This expansive and practical textbook contains organic chemistry experiments for teaching in the laboratory at the undergraduate level covering a range of functional group transformations and key organic reactions The editorial team have collected contributions from around the world and standardized them for publication Each experiment will explore a modern chemistry scenario such as sustainable chemistry application in the pharmaceutical industry catalysis and material sciences to name a few All the experiments will be complemented with a set of questions to challenge the students and a section for the instructors concerning the results obtained and advice on getting the best outcome from the experiment A section covering practical aspects with tips and advice for the instructors together with the results obtained in the laboratory by students has been compiled for each experiment Targeted at professors and lecturers in chemistry this useful text will provide up to date experiments putting the science into context for the students **Teaching Chemistry in Higher Education** Michael Seery, Claire Mc Donnell, 2019-07-01 Teaching Chemistry in Higher Education celebrates the contributions of Professor Tina Overton to the scholarship and practice of teaching and learning in chemistry education Leading educators in United Kingdom Ireland and Australia three countries where Tina has had enormous impact and influence have contributed chapters on innovative approaches that are well established in their own practice Each chapter introduces the key education literature underpinning the approach being described Rationales are discussed in the context of attributes and learning outcomes desirable in modern chemistry curricula True to Tina s personal philosophy chapters offer pragmatic and useful guidance on the

implementation of innovative teaching approaches drawing from the authors experience of their own practice and evaluations of their implementation Each chapter also offers key guidance points for implementation in readers own settings so as to maximise their adaptability Chapters are supplemented with further reading and supplementary materials on the book s website overtonfestschrift.wordpress.com Chapter topics include innovative approaches in facilitating group work problem solving context and problem based learning embedding transferable skills and laboratory education all themes relating to the scholarly interests of Professor Tina Overton About the Editors Michael Seery is Professor of Chemistry Education at the University of Edinburgh and is Editor of Chemistry Education Research and Practice Claire Mc Donnell is Assistant Head of School of Chemical and Pharmaceutical Sciences at Technological University Dublin Cover Art Christopher Armstrong University of Hull
