**Customer satisfaction towards e-banking services offered by NEPAL SBI Bank LTD** Sanjeev Pradhan, 2019-11-21 Case Study from the year 2019 in the subject Business economics Offline Marketing and Online Marketing grade A course School of Commerce and Management language English abstract This study aims to analyze the level of satisfaction of customer their agreeableness towards e banking services offered by Nepal SBI bank With the growing trend of Information Communication Entertainment and Technology it has embarked the way towards globalization It is imperative to understand the degree of customer satisfaction towards the E banking services provided by financial institutions in Nepal However the researcher has endeavored to measure and found that customer satisfaction is affected by the perceived ease of use website contents and security of services It is very obvious

in today's context to be sensitive towards the security of transactions from being phishing and hacking of customers' data and information. Hence, an ethical hacker with IT Risk Officer having expertise knowledge government support in IT Infrastructure Cloud Computing Environment is a must for the need of an hour to create a level of trusts in banks. An investigation of factors influencing corporate customers' acceptance of Internet banking Silvanice Onyango Abeka, 2012-06-28 Master's Thesis from the year 2009 in the subject Computer Science Internet New Technologies grade B course MBA INFORMATION TECHNOLOGY language English abstract It is increasingly more interesting to the bank managers to understand what is important to customers when it comes to Internet banking and especially banking conducted by the customers themselves. Corporate customers and Internet banking has been studied very modestly in the past and especially the decision making factors driving customers to go online. The purpose of this research is to identify the factors that influence corporate customers' adoption of Internet banking services in Kenya, Uganda, Tanzania and Rwanda. The hypotheses are empirically evaluated by using Trade Finance customers of an East African bank as the target sample. Technology Acceptance Model (TAM) is the primary basis for the study. The information gathered from former studies that are mainly concentrating on private customer acts as a foundation for building an extension of TAM suitable for corporate customers. Due to the quantitative nature of the study, the results are analysed with statistical measures. The analysis reveals that corporate users are not motivated by the same factors as private users. In order to become Internet banking customers, it is extremely important for corporate users to have a system that is easy to use and operate with full support from the bank.

Banking and Electronic Fund Transfers Jack Revell, 1983 Elements of payment system Electronic techniques Costs and pricing Legal and social factors Payment systems over the next ten years Operations of individual banks Competition and structure of banking system International and E-Banking Dynamics Nikki Sacnicte, 2023-11-02 The Evolution of E Banking Revolutionizing Financial Transactions E banking encompasses all financial transactions conducted between companies, organizations, individuals and their respective banking institutions. In the mid 1970s, some banks conceptualized E banking while others introduced electronic banking services in 1985. However, the growth of Internet banking faced challenges due to limited internet users and the associated costs of online banking. The Internet's Transformative Impact The landscape changed dramatically in the 1990s with the internet's explosive growth making people increasingly comfortable with internet banking and online transactions. Simultaneously, the dot-com boom fueled the expansion of E banking and the internet. During the mid 1990s, many financial institutions took steps to introduce E banking services. However, consumer apprehensions about internet-based transactions prevailed. Companies like America Online, Amazon.com and eBay played pivotal roles in encouraging electronic commerce adoption by enabling customers to make online payments for their purchases. E Banking Comes of Age A significant cultural shift occurred after concerns related to the Y2K problem subsided. Among the national institutions, Bank of America made history by reaching 3 million online banking customers. Online

customers proved to be more loyal and profitable compared to traditional customers In 2001 Bank of America set a record for processing millions of electronic bill payments emphasizing the growing trend of online banking among adults During the late 1990s Internet revolution ICICI Bank led the way by introducing internet banking to its customers in 1996 The evolution of internet banking ranged from basic web pages offering information about a bank's products and services to advanced capabilities such as account access fund transfers seamless sales processes and broader access to financial services including investments and insurance Diniz E 1998 *Strategic Planning for Electronic Banking* Dimitris N. Finanzdienstleistungsunternehmen Linn Karstadt, Cigdem Kacarel, 2010-03-09 Wissenschaftliche Studie aus dem Jahr 2005 im Fachbereich BWL Investition und Finanzierung Note 1,3 Europa Universität Flensburg ehem Universität Flensburg Internationales Institut fuer Management Sprache Deutsch Abstract Der traditionelle Auftritt der Finanzdienstleistungsunternehmen befindet sich zurzeit in einer Phase des Umbruchs. Während sich die Finanzdienstleistungsunternehmen vor einigen Jahren auf ihre Filiale vor Ort oder das Telefon konzentrierten, um mit dem Kunden Kontakt aufzunehmen, müssen sie nun auf Grund von technologischen Entwicklungen ihre Strategien neu ausrichten. Es ist das Internet, das neue Maßstäbe für den Vertrieb und das Marketing von Finanzdienstleistungen setzt. Die Anzahl der Banken, die über einen Online Auftritt verfügen, wächst stark. Eine Studie aus dem Jahr 2000 ergab, dass mehr als 95 Prozent der Banken und Versicherungen mit einer eigenen Webpräsenz im Internet vertreten sind. Das Angebot im Vertriebskanal Internet wird von den Kunden gut angenommen. Wertpapiere gehören bereits zu den zehn am häufigsten nachgefragten Waren im Internet. Insbesondere der Kauf bzw. Verkauf von Wertpapieren, aber auch Investmentfonds, spielt nach einer Studie der Hamburger Unternehmensberater Fittkau Maa nach dem privaten Online Banking die zweitwichtigste Rolle bei allen Online Finanzdienstleistungen. Die Entstehung neuer Vertriebskanäle bringt dabei nicht nur neue Marktchancen mit sich, sondern auch neue Marktrisiken für Finanzdienstleistungsunternehmen. Die Wahlmöglichkeit zwischen den verschiedenen Kanälen bedeutet gleichzeitig eine Erhöhung der Markttransparenz. Vor allem das Medium Internet bietet die Möglichkeit Leistungen und Konditionen der diversen Anbieter schnell miteinander zu vergleichen. Die hohe Transparenz bewirkt nicht nur einen Anstieg des Preisbewusstseins der Nachfrager, sondern auch eine Abnahme der Kundenloyalität bzw. Bindung. Letztendlich wird die Kundenmacht gesteigert durch die Tatsache, dass die Konkurrenz nur einen Klick entfernt liegt. Vor diesem Hintergrund bleibt die nachhaltige Kundenbindung den Finanzinstituten erschwert. Hier nun setzt das Online Marketing an. Der Herausforderung, die vom Internet ausgeht, müssen die etablierten Finanzdienstleistungsunternehmen mit Hilfe eines überzeugenden Konzepts des Online Marketing begegnen. Das Ziel der vorliegenden Arbeit ist das Online Marketing der Kapitalanlagegesellschaft American Heritage Management Corporation zu optimieren sowie Anregungen zur visuellen Gestaltung und Implementierung zu geben.

Potential Impact of Digital Currencies on Electronic Payments and Monetary Policy in the Eurozone Diana Breidenbach, 2022-07-07 Bachelor Thesis from the year 2021 in the subject Economics Finance grade 1,0 language English abstract As we move forward incidents such as the Covid 19 pandemic demonstrate the importance of having access to multiple means of payment. With the growth of digital payment options the topic of e money and its economic impact has increasingly come into academic focus. The aim of this bachelor thesis is therefore to summarize the current state of research on digital currencies and to provide new insights into their impact on payments and monetary policy. This study concentrates mainly on the European market with a particular emphasis on the Eurozone. Using recent literature and academic studies a literature review examines the impact of digital currencies on monetary policy. Further this

paper develops and demonstrates new insights about digital currencies in a quantitative empirical study. The quantitative analysis was chosen in order to obtain measurable values for comparison. From this the following research question can be derived: How could digital currencies potentially impact electronic payments and monetary policy in the Eurozone? Following the introduction, chapter two provides the reader with a comprehensive and in-depth examination of theoretical foundations. To this end, the terms currency and money are clarified and different payment systems are discussed. In addition, business models based on companies are presented as well as monetary policy and the ECB are explained in more detail. After the theory section, the third chapter covers the approach, the empirical method, and the data collection and analysis procedures. Subsequently, chapter four presents the research results to provide an answer to the research question. The fifth chapter deals with the discussion, including hypothesis testing. The final section completes the thesis with a conclusion.
