Byrne, Vincent M. Maulella, Chee Seng Soh, Alexander V. Zelenov, 2010 **Commentary on UCP 600**, 2007 **Letters of Credit and Demand Guarantees: Defences to Payment** Deborah Horowitz, 2010-06-10 This book is the first to provide an extensive analysis of the range of defences to payment under letters of credit and demand guarantees It considers the extent to which different defences undermine the abstraction of these instruments This is a fundamental issue since letters of credit and demand guarantees are designed to be abstract or autonomous from the underlying contract that called for their use The purpose of that abstraction is to provide certainty of payment but the various defences diminish that certainty The book examines the spectrum of defences that are frequently litigated and debated in international practice fraud in the documents nullity fraud affecting deferred payment letters of credit fraud as no honest belief unconscionable conduct and illegality Vitally the book provides analysis of the relevant judicial decisions and offers clear practical guidance on which defences are most suitable for each instrument As the instruments are heavily used in international trade this work is particularly suited to financial and commercial law practitioners who draft agreements as well as those who advise on disputes concerning these instruments Accessible and engaging the book is also relevant for academics and students **Law of International Business in Australasia** Robin Burnett, Vivienne Bath, 2009 This book is a successor to Robin Burnett s Law of International Business Transactions It provides an up to date analysis of the legal environment for international trade and covers the changes made to payment and letters of credit by reason of the adoption of the UCP 600 which became effective in 2007 and other means of payment which are currently used the provisions and possible adoption of the UNCITRAL Draft Convention on the Carriage of Goods Wholly or Partly by Sea recent developments in the law relating to international sale of goods the question of international arbitration and other means of dispute resolution and the strategies and issues of international operations while incorporating and building on the comprehensive information and material in the previous book It will assist practitioners and students in their understanding of the legal and practical aspects of international and overseas trade and operations **From Beginning to Beginning** Kim Sindberg, 2012-11 Between 2003 and 2011 Kim Christensen published a number of trade finance related articles in various magazines and websites July 2011 Kim Christensen changed name to Kim Sindberg This book presents the majority of feature articles written by Kim Christensen For each article a fresh comment has been written for the purpose of providing background context and additional information *Soft Law in International Trade Finance* Agatha Brandão de Oliveira, Lauro Gama, Geneviève Saumier, 2024-10-14 Expert contributors to this volume offer a comprehensive exploration of the UCP 600 s impact on international trade finance law examining the dynamic interplay between soft law and legal harmonization in 28 jurisdictions across all continents With a rich array of case studies and

Trade Finance Christopher Hare, Dora Neo, 2021-07-01 Trade Finance provides a much needed re examination of the relevant legal principles and a study of the challenges posed to current legal structures by technological changes financial innovation and international regulation Arising out of the papers presented at the symposium Trade Finance for the 21st Century this collection brings together the perspectives of scholars and practitioners from around the globe focusing on core themes such as reform and the future role of the UCP the impact of technology on letters of credit and other forms of trade finance and the rise of alternative forms of financing The book covers three key fields of trade finance starting with the challenges to traditional trade financing by means of documentary credit These include issues related to contractual enforceability the use of soft clauses the doctrine of strict compliance the fraud exception the role of the correspondent bank performance bonds and conflict of laws problems The second main area covered by the work is the technological issues and opportunities in trade finance including electronic bills of exchange blockchain and electronically transferable records The final part of the work considers alternative and complementary trade finance mechanisms such as open account trading supply chain financing the bank payment obligation and countertrade

Commentary on the UNIDROIT Principles of International Commercial Contracts (PICC) Stefan Vogenauer, Jan Kleinheisterkamp, 2009 The UNIDROIT Principles of International Commercial Contracts are the result of the ambitious quest for codifying the *lex mercatoria* i.e. those unwritten rules of the game by which merchants presumably have always understood to do international business Since the publication of their first version in 1994 the UNIDROIT Principles have had an impressive success They have become a serious alternative to national contract laws in international disputes decided by arbitral tribunals such as those administered by the International Chamber of Commerce ICC At the same time they have been accepted as a model for reforming the laws on international contract as recently Russia Lithuania and China With the publication of a new version of the Principles in 2004 this first phase of codifying international contract law is now considered to be finished While there is much writing about the theoretic legal nature and the practical applicability of the Principles there is hardly any research on their substance meaning their substantive rules on contracts This book fills this gap A comprehensive analysis of each provision of the Principles allows a better understanding of the rules governing international contracts In short this book contributes to make the application of the Principles more predictable and thus more efficient
