Water-Energy-Nexus in the Ecological Transition Vincenzo Naddeo, Kwang-Ho Choo, Mohamed Ksibi, 2022-12-15 This volume includes selected contributions presented during the 3rd edition of the international conference on WaterEnergyNEXUS which was held in Tunisia in December 2020 This conference was organized by the University of Sfax Tunisia in cooperation with the Sanitary Environmental Engineering Division SEED of the University of Salerno Italy the Advanced Institute of Water Industry at Kyungpook National University Korea and The Energy and Resources Institute TERI India The WaterEnergyNEXUS series of conferences are supported by the UNESCO World Water Association Programme WWAP and the International Water Association IWA It also enjoys the patronage of several international scientific societies associations and organizations and has established a publishing partnership with Springer Nature With the support of international experts invited as plenary and keynote speakers the conference aimed to give a platform for Euro Mediterranean countries to share and discuss key topics on such water energy issues through the presentation of nature based solutions advanced technologies and best practices for a more sustainable environment within the framework of the ecological transition This volume gives a general and brief overview of current research focusing on emerging Water Energy Nexus issues and challenges and their potential applications to various environmental problems impacting the Euro Mediterranean zone and surrounding regions A selection of novel and alternative solutions applied worldwide are included The volume contains over about one hundred carefully refereed contributions from 48 Countries worldwide selected for the conference Topics covered in the book include Nexus framework and governance Economic evaluations for investment projects in the water and energy sectors Innovation of renewable energies and challenges for the mitigation of climate change impact in the water energy food nexus Advanced technologies and nature based solutions for the environmental sustainability of the water sector Water and wastewater technologies for developing countries Green technologies for sustainable water and wastewater management Advanced technologies and nature based solutions in water cycle Control of hazardous substances and recovery of renewable valuable resources Renewable valuable resources for recovery and utilization Control of nutrients and hazardous compounds Energy saving technologies and future clean energy solutions Future urban energy systems with considerations of water and food security Environmental Biotechnology and Bioenergy Implementation and best practices This volume is also an invaluable guide for industry professionals and policymakers working in the water and energy sectors [The Indian Journal of Agricultural Sciences](#), 2013 **Internet of Things and Analytics for Agriculture, Volume 3** Prasant Kumar Pattnaik, Raghvendra Kumar, Souvik Pal, 2021-11-10 The book discusses one of the major challenges in agriculture which is delivery of cultivate produce to the end consumers with best possible price and quality Currently all over the world it is found that around 50% of the farm produce never reaches the end consumer due to wastage and suboptimal prices The authors present solutions to reduce the transport cost predictability of

prices on the past data analytics and the current market conditions and number of middle hops and agents between the farmer and the end consumer using IoT based solutions Again the demand by consumption of agricultural products could be predicted quantitatively however the variation of harvest and production by the change of farm s cultivated area weather change disease and insect damage etc could be difficult to be predicted so that the supply and demand of agricultural products has not been controlled properly To overcome this edited book designed the IoT based monitoring system to analyze crop environment and the method to improve the efficiency of decision making by analyzing harvest statistics The book is also useful for academicians working in the areas of climate changes

Dynamic Stability of Hydraulic Gates and Engineering for Flood Prevention Ishii, Noriaki, Anami, Keiko, Knisely, Charles W., 2017-08-11 Hydraulic gates are utilized in multiple capacities in modern society As such the failure of these gates can have disastrous consequences and it is imperative to develop new methods to avoid these occurrences Dynamic Stability of Hydraulic Gates and Engineering for Flood Prevention is a critical reference source containing scholarly research on engineering techniques and mechanisms to decrease the failure rate of hydraulic gates Including a range of perspectives on topics such as fluid dynamics vibration mechanisms and flow stability this book is ideally designed for researchers academics engineers graduate students and practitioners interested in the study of hydraulic gate structure

Plant Flow Measurement and Control Handbook Swapan Basu, 2018-08-22 Plant Flow Measurement and Control Handbook is a comprehensive reference source for practicing engineers in the field of instrumentation and controls It covers many practical topics such as installation maintenance and potential issues giving an overview of available techniques along with recommendations for application In addition it covers available flow sensors such as automation and control The author brings his 35 years of experience in working in instrumentation and control within the industry to this title with a focus on fluid flow measurement its importance in plant design and the appropriate control of processes The book provides a good balance between practical issues and theory and is fully supported with industry case studies and a high level of illustrations to assist learning It is unique in its coverage of multiphase flow solid flow process connection to the plant flow computation and control Readers will not only further understand design but they will also further comprehend integration tactics that can be applied to the plant through a step by step design process that goes from installation to operation Provides specification sheets engineering drawings calibration procedures and installation practices for each type of measurement Presents the correct flow meter that is suitable for a particular application Includes a selection table and step by step guide to help users make the best decision Cover examples and applications from engineering practice that will aid in understanding and application

Smart Farming Technologies for Sustainable Agricultural Development Poonia, Ramesh C., Gao, Xiao-Zhi, Raja, Linesh, Sharma, Sugam, Vyas, Sonali, 2018-08-10 In order to meet food needs farmers need to integrate the latest technologies enabling them to make more informed decisions Smart Farming Technologies for Sustainable Agricultural Development provides innovative insights into

the latest farming advancements in terms of informatics and communication The content within this publication represents the work of topics such as sensor systems wireless communication and the integration of the Internet of Things in agriculture related processes It is a vital reference source for farmers academicians researchers government agencies technology developers and graduate level students seeking current research on smart farming technologies

Urban Ecology, Water Quality and Climate Change Arup K. Sarma,Vijay P. Singh,Rajib K. Bhattacharjya,Suresh A. Kartha,2018-03-14 This unique book brings together high quality research contributions on ecological aspects of urbanization water quality concerns in an urban environment and climate change issues with a strong Indian focus under one umbrella It includes several case studies that discuss urban water management particularly highlighting the quality aspects Urbanization is an ecological disturbance that the modern world accepts as essential in the absence of a better alternative that could provide an equal level of comfort The prohibitive costs of eco friendly production technologies are forcing the developing world to generate industrial waste that is detrimental to the environment At the same time the availability of adequate fresh water is another challenge for our climate change impacted world The scientific community is therefore searching for ways towards ecologically sustainable urban development Discussing all these issues this book offers a useful guide for academicians researchers practicing engineers and managers dealing with diverse water related problems in urban areas
