Quality Management Systems ,2015 **A conceptual framework for the automated assessment of IT security risks based on enterprise architecture** Tim Huse,2021-09-07 Master s Thesis from the year 2020 in the subject Computer Science IT Security grade 1 0 Free University of Berlin language English abstract The complexity of enterprise architectures and the associated IT security risks are constantly increasing Traditional approaches to IT risk management operate in silos and make it difficult to obtain a company wide view of existing threats The objective of this thesis is to develop an assessment framework that enables an automated comprehensive view of existing IT security risks within the enterprise architecture For this purpose concepts of IT risk management are extended with principles of enterprise architecture management Based on a research approach according to the design science research paradigm an artifact the so called Enterprise Architecture Management Risk Assessment ERA framework will be developed based on a problem analysis and requirements gathering from practice and science The ERA framework will be prototypically implemented and evaluated as a dashboard solution in a case study with a German bank The evaluation will take place in two iterations qualitative by means of expert interviews and quantitative by means of a survey The evaluation of the ERA framework artifact and its prototypical dashboard implementation confirms its usefulness usability and non triviality Furthermore possible extension and improvement possibilities of the artifact are disclosed The designed evaluation framework contributes to research at the interface of IT security and enterprise architecture management as well as to the solution of a practical relevant problem **Malaysian Standard** Institiut Piawaian dan Penyelidikan Perindustrian Malaysia,2010 **Appraisal of the role of environmental law in risk management in Nigeria** Matthias Okoro,2014-10-01 Seminar paper from the year 2012 in the subject Environmental Sciences grade A University of Nigeria CENTER FOR ENVIRONMENTAL MANAGEMENT AND CONTROL course ENVIRONMENTAL MANAGEMENT AND CONTROL language English abstract In ideal risk management a prioritization process is followed whereby the risks with the greatest loss or impact and the greatest probability of occurring are handled first and risks with lower probability of occurrence and lower loss are handled in descending order In practice the process of assessing overall risk can be difficult and balancing resources used to mitigate between risks with a high

probability of occurrence but lower loss versus a risk with high loss but lower probability of occurrence can often be mishandled Intangible risk management identifies a new type of a risk that has a 100% probability of occurring but is ignored by Government or organization due to a lack of identification ability In Nigeria some time this is what is obtainable in the social and physical environment In view of the above fact environmental laws have been put in place to regulate every activity on the environment to manage the risk involved in these process and stage of development in other to avoid an impending or a looming catastrophe According to the International Network for Environmental Compliance and Enforcement INECE the major environmental issues in Nigeria are drought and flooding air pollution deforestation loss of biodiversity freshwater availability degradation of soil and vegetation and widespread poverty Government and other organizations hope to provide protection and mitigation regarding pollution and other disasters before their impacts contaminate the African environment as well as the global environment Therefore chronicled in this write up is the appraisal of the role of Environmental Law in risk management   CompTIA Security+ All-in-One Exam Guide, Fifth Edition (Exam SY0-501) Wm.
