Robert J. Seidel, Paul R. Chatelier, 2013-06-29 In 1988 the NATO panel governing human sciences Panel 8 on Defence Application of Human and Bio Medical Sciences established a Research Study Group to synthesize information relevant to

Advanced Technologies Applied to Training Design During its first phase the RSG established an active exchange of information on advanced technologies applied to training design and stimulated much military application of these technologies. With the increased emphasis on training throughout the alliance Panel 8 during its April 1991 meeting decided to continue with Phase II of this RSG focusing in the area of advanced training technologies that were emerging within the alliance. In order to accomplish its mission the RSG held a series of workshops. Leaders in technology and training were brought together and exchanged information on the latest developments in technologies applicable to training and education. This volume represents the last in a series based on the NATO workshops. In Part One it details findings from the last workshop Virtual Reality for Training and in Part Two we provide a summary perspective on Virtual Reality and the other emerging technologies previously studied. These include computer based training expert systems authoring systems cost effectiveness and distance learning. It is a natural extension to proceed from learning without boundaries to virtual environments. From the extended classroom to the individual or team immersion in a distributed virtual and collaborative environment is an easy conceptual step.

**Routledge Handbook of the Influence Industry** Emma L. Briant, Vian Bakir, 2024-10-15 This Handbook provides the first comprehensive examination of the influence industry and how it operates worldwide across different domains. The rapid evolution of emerging technologies and data driven persuasive practices has been linked to the spread of misleading content in domestic and foreign influence campaigns. This has prompted worldwide public and policy discussions about disinformation and how to curb its spread. However less attention has been paid to the increasingly data driven commercial industry taking advantage of the opportunities these new technologies afford. The handbook uses the term influence here to include not only messaging and public relations PR which fell within the traditional focus of propaganda studies but to consider the infrastructure and actors behind an advanced array of capabilities that can be used in a coordinated way to affect an audience's emotions ideas and behaviors in order to advance a state or non state actor's objectives increasingly based on data driven profiling. The volume fills a gap in scholarship exploring the recent technical political and economic development of this industry surveying the extent of different technologies and services offered to clients worldwide across multiple domains commercial political national security and government. The chapters are divided into three thematic sections and evaluate Influence Industry practices aims and effectiveness across audiences business practices and economics and democratic structures and human rights. They also offer advice for researchers and consider key ethical issues and new regulatory approaches. This volume will be of much interest to students of political science propaganda studies sociology communication studies and journalism.
