AI and Digital Technology for Oil and Gas Fields Niladri Kumar Mitra, 2024-10-18 The book essentially covers the growing role of AI in the oil and gas industry including digital technologies used in the exploration phase customer sales service and cloud based digital storage of reservoir simulation data for modeling It starts with the description of AI systems and their roles within the oil and gas industry including the agent based system the impact of industrial IoT on business models and the ethics of robotics in AI implementation It discusses incorporating AI into operations leading to the reduction of operating costs by localizing control functions remote monitoring and supervision Features of this book are given as follows It is an exclusive title on the application of AI and digital technology in the oil and gas industry It explains cloud data management in reservoir simulation It discusses intelligent oil and gas well completion in detail It covers marketing aspects of oil and gas business during the exploration phase It reviews development of digital systems for business purposes This book is aimed at professionals in petroleum and chemical engineering technology and engineering management Fast Algorithms for Digital Signal Processing Richard E. Blahut, 1985 Introduction to abstract algebra Fast algorithms for short convolutions Fast algorithms for the discrete Fourier transform Number theory and algebraic field theory Computation in surrogate fields Fast algorithms and multidimensional convolutions Fast algorithms and multidimensional transforms Architecture of filters and transforms Fast algorithms based on doubling strategies Fast algorithms for solving Toeplitz systems Fast algorithms for Trellis and tree search A collection of cyclic convolution algorithms A collection of Winograd small FFT algorithms *Machines and Tooling*, 1980 **Philosophy of Artificial Intelligence and Its Place in Society** Moutinho, Luiz, Cavique, Luís, Bigné, Enrique, 2023-10-16 The early 2020s have been marked by a surge of interest in artificial intelligence AI and it has grown to be one of the hottest topics in computer science business technology research and educational technologies Despite AI winters in the 1970s and 1990s where interest and subsequently adequate funding for AI research ceased and as the technology and its usefulness become more perceptible often with brilliant results society is once again ready to investigate this powerful technology and its potential However a challenge arises when AI is called into question in an ethical context It is important that we explore how it can contribute to the resolution of ethical social and environmental issues and also to address growing concerns around AI developing emergent bias as well as the human application of AI for malicious purposes With recent AI based writing technologies concerns around academic integrity abound and challenge our perceptions of authenticity in writing A careful assessment of these technologies their usefulness and potential harm and strategic solutions to maintaining ethical standards and regulation of the technology is a necessity for the maintenance of civilized life amidst these tools Philosophy of Artificial Intelligence and Its Place in Society evaluates various aspects of artificial intelligence including the range of technologies their advantages and disadvantages and how AI systems operate Spanning from machine learning to deep learning philosophical insights societal concerns and the newest

approaches to AI it helps to develop an appreciation for and breadth of knowledge across the full range of AI sub disciplines including neural networks evolutionary computation computer vision robotics expert systems speech processing and natural language processing Led Dr Luiz Moutinho of the University of Suffolk in the United Kingdom who has won several awards for his academic literature this book provides academic market scholars researchers and students of philosophy sociology economics and education as well as corporate scientists with a comprehensive collection of core research elements concepts advances applications evidence and outcomes related to artificial intelligence *Digital Signal Processing with Examples in MATLAB* Samuel D. Stearns, Donald R. Hush, 2016-04-19 Based on fundamental principles from mathematics linear systems and signal analysis digital signal processing DSP algorithms are useful for extracting information from signals collected all around us Combined with today s powerful computing capabilities they can be used in a wide range of application areas including engineering communicati

Digital Signal Processing Algorithms Hari Krishna, 1998-03-25 Digital Signal Processing Algorithms describes computational number theory and its applications to deriving fast algorithms for digital signal processing It demonstrates the importance of computational number theory in the design of digital signal processing algorithms and clearly describes the nature and structure of the algorithms themselves The book has two primary focuses first it establishes the properties of discrete time sequence indices and their corresponding fast algorithms and second it investigates the properties of the discrete time sequences and the corresponding fast algorithms for processing these sequences Digital Signal Processing Algorithms examines three of the most common computational tasks that occur in digital signal processing namely cyclic convolution acyclic convolution and discrete Fourier transformation The application of number theory to deriving fast and efficient algorithms for these three and related computationally intensive tasks is clearly discussed and illustrated with examples Its comprehensive coverage of digital signal processing computer arithmetic and coding theory makes Digital Signal Processing Algorithms an excellent reference for practicing engineers The authors intent to demystify the abstract nature of number theory and the related algebra is evident throughout the text providing clear and precise coverage of the quickly evolving field of digital signal processing
