Alternative Food Networks for Sustainable, Just, Resilient and Productive Food Systems José Luis Vicente-Vicente, Lukas Egli, Felix Zoll, Simona Zollet, 2024-10-01 There is growing evidence that the current globalised agri food system is neither sustainable nor resilient It is responsible for around one third of the global GHG emissions and is a major driver of biodiversity loss Furthermore its structure and distribution mode do not provide food security for all and foster socio economic inequalities between different parts of the planet Consequently an increasing number of scientists and members of the civil society are demanding a radical transformation of agri food systems The creation of alternative food networks AFNs represent a possible first step towards agri food system transformation AFNs can incorporate local indigenous and innovative knowledge and bring together a diversity of actors to connect food production and consumption and create new practices and relationships around food The creation of AFNs and ultimately of Alternative Food Systems AFS should involve different actors from farmers to social movements from policymakers to scientists AFNs have the potential to contribute to a transformation towards sustainable just resilient and productive food systems but even though they have increased in numbers and organisational forms in recent years they still remain in a niche Consequently scientific evidence of their performance is still limited This research topic will contribute to a comprehensive multi scalar and critical e g including potential counter effects understanding of the current state and future potential of AFNs It will address multiple aspects ranging from social economic and environmental aspects to productivity participation and justice Moreover it will highlight the role of governance power relations and institutions as well as barriers and ways forward to promote AFNs and their role in food system transformation
