

Command words (Science)

Command words are the words and phrases used in exams that tell students how they should answer a question.

The following command words are taken from Ofqual's official list of command words and their meanings that are relevant to this subject. In addition, where necessary, we have included our own command words and their meanings to complement Ofqual's list.

Command words marked * are new for teaching from 2016.

Calculate

Students should use numbers given in the question to work out the answer.

Choose*

Select from a range of alternatives.

Compare

This requires the student to describe the similarities and/or differences between things, not just write about one.

Complete

Answers should be written in the space provided, for example on a diagram, in spaces in a sentence, or in a table.

Define*

Specify the meaning of something.

Describe

Students may be asked to recall some facts, events or process in an accurate way.

Design*

Set out how something will be done.

Determine*

Use given data or information to obtain an answer.

Draw

To produce, or add to, a diagram.

Estimate

Assign an approximate value.

Learning to Teach Science in the Secondary School Lindsay Hetherington, Luke Graham, Darren Moore, 2024-06-27

Learning to Teach Science in the Secondary School is an indispensable guide to the process practice and reality of learning to teach science in a busy secondary school. Written by experienced teachers and expert academics, it explores core debates and topics in science education, providing practical and insightful advice with research and theory to support your development as a teacher. This fully updated fifth edition focuses on the knowledge and skills you will need to develop your science teaching, including key approaches to teaching physics, chemistry, and biology, lesson and curriculum planning, and assessment. There are also new chapters on Safety in science teaching, The science of learning for teaching science, Mathematics and learning science, Science for social justice, Inclusive and adaptive science teaching, Making use of research, practical guidance for science teachers, Written with university and school-based initial teacher education in mind, and including learning objectives, lists of useful resources, and specially designed tasks in every chapter. Learning to Teach Science in the Secondary School offers all student and early career teachers accessible and comprehensive guidance to support the journey of becoming an effective science teacher. Secondary Science in Action Emily Clark

Giubertoni, Richard Giubertoni, 2024-09-13 There is nothing more exciting in science teaching than transforming students into effective, enthusiastic biologists, chemists, and physicists. To this end, this book spells out the skills and strategies of the successful science teacher in action. Drawing on years of teaching experience, Richard and Emily Giubertoni set out top tips for effective practice in all areas of a science teacher's role, from curriculum planning to managing practicals, from powerful hinterland stories to how to approach controversial topics. The useful approaches set out in this book will have value for science teachers at all stages of their careers, from trainee teachers to department leaders. Being an effective teacher is not innate; we can all learn to teach, to teach well, and to teach better. In this thoroughly comprehensive overview of science teaching in action, all science teachers will find ideas to strengthen, inspire, and further develop their teaching practice in a practical and pragmatic book that is enjoyable and engaging to read. **AQA Computer Science for GCSE Student Book**
