**Actas de Las VIII Jornadas de Concurrencia** Diego Cazorla López,2000 La proliferaci n actual de sistemas concurrentes en general debido al abaratamiento sustancial de poderosos sistemas de c mputo y el auge cada vez mayor que toman las aplicaciones

distribuidas hace que cada vez sea más interesante el estudio de los sistemas concurrentes en todos los aspectos de la Informática. La mayor complejidad y tamaño de los secuenciales convencionales exige el uso de técnicas adecuadas tanto para su diseño y análisis como para su posterior implementación práctica. Este libro contiene las comunicaciones que han sido presentadas en la Octava edición de las Jornadas de Concurrencia celebradas en Cuenca en junio de 2000. Este es un foro para el intercambio de experiencias entre los investigadores nacionales tanto de la Universidad como de la Industria en el campo de los sistemas concurrentes y por tanto en él se muestran tanto los resultados teóricos como las aplicaciones industriales más recientes en esta materia. **Proceedings of the IEEE ... **Databases in Networked Information Systems** Subhash Bhalla, 2000-11-22. This book constitutes the refereed proceedings of the International Workshop on Databases in Networked Information Systems DNIS 2000 held in Aizu, Japan in December 2000. The 17 revised full invited and selected papers have been carefully reviewed for inclusion in the book. The papers are organized in topical sections on data management systems, database systems, storage and retrieval, and networked information systems applications. *Seventh International Workshop on Database and Expert Systems Applications* Roland R. Wagner, 1996. Annotation: The proceedings of the IEEE International Workshop on Database and Expert Systems Applications held in September 1996 comprise a total of 25 sessions focusing on object-oriented databases, active and temporal aspects, expert and knowledge-based systems, applications, transaction concepts, and physical aspects, advanced database and information system methods, CSCW, and workflow management systems, and relational and extended relational approaches. Lacks a subject index. Annotation copyrighted by Book News, Inc., Portland, OR. **Technical Foundations of Client/Server Systems** Carl Hall, 1994-11-03. Written by a specialist in client-server development and transaction processing systems, this text is a crystal-clear introduction to client-server systems that cuts through the vagueness of most client-server manuals to provide clear-cut technical advice. **Database Directions** James A. Larson, 1995. While solving numerous database management problems, relational database systems are generally limited to centralized systems supporting only structured data. Now *Database Directions* introduces database management technologies and techniques that take readers beyond the limitations of today's relational database management systems. **Database** Patrick O'Neil, 1994. This second edition relies on the same successful approach that distinguished the first: it covers the principles of database theory with unmatched thoroughness and it rigorously links theory to the real world of database programming and administration. A careful discussion of SQL standards and a multitude of examples drawn from actual databases (Oracle, DB2, and Informix) complements the author's concept-oriented instruction, allowing you to develop product-specific understanding and to learn the important differences between the SQL dialects that will enable you to write portable applications. *Basque International Workshop on Information Technology*, 1995.
