Sacrifice Its Nature And Functions:

Sacrifice Henri Hubert, Marcel Mauss, 1912-12-15 Marcel Mauss was the nephew and most distinguished pupil of mile Durkheim whose review *L'Ann e sociologique* he helped to found and edit Henri Hubert was another member of the group of sociologists who developed under the influence of Durkheim The present book is one of the best known essays published in *L'Ann e sociologique* and has been regarded as a model for method and mode of interpretation Its subject is at the very center of the comparative study of religion The authors describe a basic sacrifice drawn from Indian sources and show what is fundamental and constant comparing Indian and Hebrew practices in particular then Greek and Roman then additional practices from many eras and cultures *Sacrifice: Its Nature and Function* Henri Hubert, 2013 *Sacrifice: Its Nature and Function [by] Henri Hubert and Marcel Mauss. Translated by W. D. Halls. Foreword by E. E. Evans-Pritchard* Henri Hubert, [Expanding the Economic Concept of Exchange](#) Caroline Gerschlager, 2012-12-06 Exchange is a pervasive concept in everyday life affecting phenomena as diverse as interpersonal relationships and market transactions In addition economists have used the concept in a highly specific and clearly delineated way Against this background *Expanding the Economic Concept of Exchange* sets out to expand the concept of exchange by crossing the boundaries laid down by economists and by examining the function played by deceptions self deceptions and illusions The main motivation for expanding the concept of exchange was the realization that in the prototypical economic model deception is not taken into account Hence economists traditionally regard deception as some sort of irrationality as a flaw in an otherwise perfectly rational process Authors represented in this volume take a different approach examining deception as a constituent quality of exchange This is shown by the contributions drawing on recent developments in economic theory by those with an anthropological orientation as well as by a contribution referring specifically to Adam Smith An interrogation into deception is long overdue in economics This volume prepares the ground for and makes the first contributions to explicitly acknowledging deceptions self deceptions and illusions as fundamental dimensions allowing us as economists to further research and develop the concept of change A particular and perhaps unexpected focus of this volume lies on anthropology because economics can clearly benefit from integrating selected results on deception from outside its expanding domain It is primarily targeted at economists interested in institutional aspects of exchanges and social theory In addition the topic will find interested readers from anthropology cultural studies science studies philosophy **Christ and Horrors** Marilyn McCord Adams, 2006-09-21 Publisher description [The Ashgate Research Companion to Anthropology](#) Andrew J. Strathern, 2016-03-03 This companion provides an indispensable overview of contemporary and classical issues in social and cultural anthropology Although anthropology has expanded greatly over time in terms of the diversity of topics in which its practitioners engage many of the broad themes and topics at the heart of anthropological thought remain perennially vital such as understanding order and change diversity and continuity and conflict and co operation in the reproduction of social

life Bringing together leading scholars in the field the contributors to this volume provide us with thoughtful and fruitful ways of thinking about a number of contemporary and long standing arenas of work where both established and more recent researchers are engaged The companion begins by exploring classic topics such as Religion Rituals Language and Culture Violence and Gender This is followed by a focus on current developments within the discipline including Human Rights Globalization and Diasporas and Cosmopolitanism It provides an interesting and challenging look at the state of current thinking in anthropology serving as a rich resource for scholars and students alike

Visions of Excess Georges Bataille,1985 *Sacrifice* Henri-Pierre Hubert,Marcel Mauss,E. E. Evans-Pritchard,1973 **On the Margins of Religion** Frances Pine,João de Pina-Cabral,2008 Focusing on places objects bodies narratives and ritual spaces where religion may be found or inscribed the authors reveal the role of religion in contesting rights to places to knowledge and to property as well as access to resources Through analyses of specific historical processes in terms of responses to socio economic and political change the chapters consider implicitly or explicitly the problematic relation between science including social sciences and anthropology in particular and religion and how this connects to the new religious globalisation of the twenty first century Their ethnographies highlight the embodiment of religion and its location in landscapes built spaces and religious sites which may be contested physically or ideologically or encased in memory and often in silence Taken together they show the importance of religion as a resource to the believers a source of solace spiritual comfort and self willed submission

French Sacrifice Melissa Mary Ptacek,2006 **Israel and Hellas** John Pairman Brown,1995 Different Conceptions of Priesthood and Sacrifice William Sanday,1900 *Discourses Illustrative of the Nature and Work of the Holy Spirit and Other Papers* Samuel Seabury,1874 **Rituals Of Blood** Orlando Patterson,1998 In the first essay Patterson analyzes the very latest survey data to delineate the different attitudes behaviors and circumstances of Afro American men and women dissecting both the external and internal causes for the great disparities he finds In the second essay Patterson focuses on the lynching of Afro American boys and men during the decades after Reconstruction particularly on the substantial number of cases that constituted apparent ritual human sacrifice As no one has done before Patterson reveals how the complex interplay between Christian sacrificial symbolism and the deep recesses of post bellum Southern culture resulted in some of the most shameful barbaric events in American history The third essay brings us into the late twentieth century with an investigation of the various images of Afro American men portrayed by the media From the demigod Michael Jordan to the demon Colin Ferguson to the demigod turned demon O J Simpson and the crossers of racial and gender boundaries Michael Jackson and Dennis Rodman all contribute to the cultural complications of our contemporary society **Rituals of Blood** advances Patterson s new model of ethnic relations that opens American society to a new and freer dialogue

The Teleo-mechanics of Nature Hermann Wettstein,1911 *Nature, Choice and Social Power* Erica Schoenberger,2014-08-21 We are at an environmental impasse Many blame our personal choices about the things we consume and the way we live This

is only part of the problem Different forms of social power political economic and ideological structure the choices we have available This book analyses how we make social and environmental history and why we end up where we do Using case studies from different environmental domains earth and water air and fire Nature Choice and Social Power examines the form that social power takes and how it can harm the environment and hinder our efforts to act in our own best interests The case studies challenge conventional wisdoms about why gold is valuable why the internal combustion engine triumphed and when and why suburbs sprawled The book shows how the power of individuals the power of classes the power of the market and the power of the state at different times and in different ways were critical to setting us on a path to environmental degradation It also challenges conventional wisdoms about what we need to do now Rather than reducing consumption and shrinking from outcomes we don't want it proposes growing towards outcomes we do want We invested massive resources in creating our problems it will take equally large investments to fix them Written in a clear and engaging style the book is underpinned with a political economy framework and addresses how we should understand our responsibility to the environment and to each other as individuals within a large and impersonal system
