   Software Design David Budgen,2020-12-28 Software Design Creating Solutions for Ill Structured Problems Third Edition

provides a balanced view of the many and varied software design practices used by practitioners The book provides a general overview of software design within the context of software development and as a means of addressing ill structured problems The third edition has been expanded and reorganised to focus on the structure and process aspects of software design including architectural issues as well as design notations and models It also describes a variety of different ways of creating design solutions such as plan driven development agile approaches patterns product lines and other forms Features Includes an overview and review of representation forms used for modelling design solutions Provides a concise review of design practices and how these relate to ideas about software architecture Uses an evidence informed basis for discussing design concepts and when their use is appropriate This book is suitable for undergraduate and graduate students taking courses on software engineering and software design as well as for software engineers Author David Budgen is a professor emeritus of software engineering at Durham University His research interests include evidence based software engineering EBSE software design and healthcare informatics *Software Engineering* ,2012 Software Product Quality Control Stefan Wagner,2013-07-25 Quality is not a fixed or universal property of software it depends on the context and goals of its stakeholders Hence when you want to develop a high quality software system the first step must be a clear and precise specification of quality Yet even if you get it right and complete you can be sure that it will become invalid over time So the only solution is continuous quality control the steady and explicit evaluation of a product s properties with respect to its updated quality goals This book guides you in setting up and running continuous quality control in your environment Starting with a general introduction on the notion of quality it elaborates what the differences between process and product quality are and provides definitions for quality related terms often used without the required level of precision On this basis the work then discusses quality models as the foundation of quality control explaining how to plan desired product qualities and how to ensure they are delivered throughout the entire lifecycle Next it presents the main concepts and techniques of continuous quality control discussing the quality control loop and its main techniques such as reviews or testing In addition to sample scenarios in all chapters the book is rounded out by a dedicated chapter highlighting several applications of different subsets of the presented quality control techniques in an industrial setting The book is primarily intended for practitioners working in software engineering or quality assurance who will benefit by learning how to improve their current processes how to plan for quality and how to apply state of the art quality control techniques Students and lecturers in computer science and specializing in software engineering will also profit from this book which they can use in practice oriented courses on software quality software maintenance and quality assurance *Virtual and Networked Organizations, Emergent Technologies and Tools* Goran D. Putnik,Maria Manuela Cruz-Cunha,2012-07-25 This book constitutes the thoroughly refereed post conference proceedings of the First International Conference on Virtual and Networked Organizations Emergent Technologies and Tools ViNOrg 2011 held in Ofir Portugal in July 2011 The 35 revised full papers presentedwere

carefully reviewed and selected from over 60 initial submissions The papers cover a wide range of topics such as ubiquitous computing and organizations cloud computing and architectures grid computing human computer interfaces serious games data mining Web services cognitive systems social networks and other emergent IT IS approaches in various function domains such as decision support systems planning design control negotiation marketing management and many other in the context of virtual and networked enterprises and organizations *Professional Empowerment in the Software Industry through Experience-Driven Shared Tacit Knowledge* Hui Chen,Miguel Baptista Nunes,2023-05-19 This book addresses the identification and classification of knowledge acquired through experience that results from engaging in professional activities within the software industry As a result of this study the book presents an ontology of such professional activities that require and enable the acquisition of experience and that in turn are the basis for tacit knowledge creation The rationale behind the creation of such an ontology was based on the need to externalize this tacit knowledge and then record such externalizations so that these can be shared and disseminated within and across organizations The book discusses the very concise manner in which experienced software development practitioners in China understand the nature and value of experience in the SW industry effectively communicate with other stakeholders in the software development process are able and motivated to actively engage with continuous professional development are able to share knowledge with peers and the profession at large and effectively work on projects and exhibit a sound professional attitude both internally to their own company and externally to customers partners and even competitors The book also discusses the ontology and the qualitative process that are generated by bridging two extremely topical aspects of practice in the software industry namely employability skills and competencies The book is of interest to academics in the areas of knowledge management and information systems as well as human resources practitioners concerned with selection and development and knowledge and information professionals in software organizations **Software Engineering** Shari Lawrence Pfleeger,Joanne M.
