book offers a detailed insight into the desire for and consequences of precise communications in the daily life of  
contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz Caruso  
St John Architects Mies van der Rohe and OMA In the professionalised context of the contemporary architectural profession  
precise communications drawings specifications letters faxes and emails are charged with the complex task of translating  
architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the  
architects intentions and the constructed result Yet as any architectural practitioner will know it is doubtful whether the  
construction of any architectural project may ever exactly match all written and drawn predictions This book challenges  
claims to certainty which have been attributed to such communications from the mid nineteenth century onwards and  
critiques ongoing expectations of certainty in contemporary architectural production      *I-CAR Unibody Collision Repair*
