The world of computation according to Turing an interactive tutoring program as told to star crossed lovers a novel Our hero is Turing an interactive tutoring program and namesake or virtual emanation of Alan Turing World War II code breaker and father of computer science In this unusual novel Turing s idiosyncratic version of intellectual history from a computational point of view unfolds in tandem with the story of a love affair involving Ethel a successful computer executive Alexandros a melancholy archaeologist and Ian a charismatic hacker After Ethel who shares her first name with Alan Turing s mother abandons Alexandros following a sundrenched idyll on Corfu Turing appears on Alexandros s computer screen to unfurl a tutorial on the history of ideas He begins with the philosopher mathematicians of ancient Greece discourse dialogue argument proof can only thrive in an egalitarian society and the Arab scholar in ninth century Baghdad who invented algorithms he moves on to many other topics including cryptography and artificial intelligence even economics and developmental biology These lessons are later critiqued amusingly and developed further in postings by a fictional newsgroup in the book s afterword As Turing s lectures progress the lives of Alexandros Ethel and Ian converge in dramatic fashion and the story takes us from Corfu to Hong Kong from Athens to San Francisco and of course to the Internet the disruptive technological and social force that emerges as the main locale and protagonist of the novel Alternately pedagogical and romantic Turing A Novel about Computation should appeal both to students and professionals who want a clear and entertaining account of the development of computation and to the general reader who enjoys novels of ideas
