Mplus Code For Mediation Moderation And Moderated:

HRM and Employability Jasmijn van Harten, Nele De Cuyper, David Guest, Mel Fugate, Eva Knies, Anneleen Forrier, 2022-12-26 Employability is attracting growing attention from researchers and practitioners alike given the contemporary employment landscape one characterized by technological changes ageing populations and competitive organizational environments This interest is in part motivated by the realisation that employability implies a win win situation as employable workers have stocks of knowledge skills and abilities and they are flexible and open to change However the role of the employer and specifically their investments in Human Resource Management policies and practices are largely absent in the current employability discourse Employability is usually regarded as an individual asset in which employees carry almost all responsibility for employability maintenance and development Remarkably little has been done to remedy the neglect of the employer perspective and advance knowledge and practice This book brings together contributions from an international team of renowned management scholars who explore how Human Resource Management investments affect workers employability Drawing on empirical evidence from all over the world this book informs researchers practitioners and students in the fields of business and management especially those with a particular interest in HRM and organizational behaviour The chapters in this book were originally published as a special issue of The International Journal of Human Resource Management

Structural Equation Modeling for Health and Medicine Douglas D. Gunzler, Adam T. Perzynski, Adam C. Carle, 2021-03-29 Structural equation modeling SEM is a very general and flexible multivariate technique that allows relationships among variables to be examined The roots of SEM are in the social sciences In writing this textbook the authors look to make SEM accessible to a wider audience of researchers across many disciplines addressing issues unique to health and medicine SEM is often used in practice to model and test hypothesized causal relationships among observed and latent unobserved variables including in analysis across time and groups It can be viewed as the merging of a conceptual model path diagram confirmatory factor analysis and path analysis In this textbook the authors also discuss techniques such as mixture modeling that expand the capacity of SEM using a combination of both continuous and categorical latent variables Features Basic intermediate and advanced SEM topics Detailed applications particularly relevant for health and medical scientists Topics and examples that are pertinent to both new and experienced SEM researchers Substantive issues in health and medicine in the context of SEM Both methodological and applied examples Numerous figures and diagrams to illustrate the examples As SEM experts situated among clinicians and multidisciplinary researchers in medical settings the authors provide a broad current on the ground understanding of the issues faced by clinical and health services researchers and decision scientists This book gives health and medical researchers the tools to apply SEM approaches to study complex relationships between clinical measurements individual and community level characteristics and patient reported scales
