In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the handle along the path to create a blue-to-purple gradient, which can then be moved along the gradient path.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Radial** to apply a default gradient. Drag across your object to create a custom path for the gradient.
