Philosophy of Artificial Intelligence and Its Place in Society Moutinho, Luiz, Cavique, Luís, Bigné, Enrique, 2023-10-16 The early 2020s have been marked by a surge of interest in artificial intelligence AI and it has grown to be one of the hottest topics in computer science business technology research and educational technologies Despite AI winters in the 1970s and 1990s where interest and subsequently adequate funding for AI research ceased and as the technology and its usefulness become more perceptible often with brilliant results society is once again ready to investigate this powerful technology and its potential However a challenge arises when AI is called into question in an ethical context It is important that we explore how it can contribute to the resolution of ethical social and environmental issues and also to address growing concerns around AI developing emergent bias as well as the human application of AI for malicious purposes With recent AI based writing technologies concerns around academic integrity abound and challenge our perceptions of authenticity in writing A careful assessment of these technologies their usefulness and potential harm and strategic solutions to maintaining ethical standards and regulation of the technology is a necessity for the maintenance of civilized life amidst these tools Philosophy of Artificial Intelligence and Its Place in Society evaluates various aspects of artificial intelligence including the range of technologies their advantages and disadvantages and how AI systems operate Spanning from machine learning to deep learning philosophical insights societal concerns and the newest approaches to AI it

helps to develop an appreciation for and breadth of knowledge across the full range of AI sub disciplines including neural networks evolutionary computation computer vision robotics expert systems speech processing and natural language processing Led Dr Luiz Moutinho of the University of Suffolk in the United Kingdom who has won several awards for his academic literature this book provides academic market scholars researchers and students of philosophy sociology economics and education as well as corporate scientists with a comprehensive collection of core research elements concepts advances applications evidence and outcomes related to artificial intelligence *Machines and Tooling* ,1980 **Digital Signal Processing with Examples in MATLAB** Samuel D. Digital Signal Processing Algorithms Hari Krishna,1998-03-25 *Digital Signal Processing Algorithms* describes computational number theory and its applications to deriving fast algorithms for digital signal processing It demonstrates the importance of computational number theory in the design of digital signal processing algorithms and clearly describes the nature and structure of the algorithms themselves The book has two primary focuses first it establishes the properties of discrete time sequence indices and their corresponding fast algorithms and second it investigates the properties of the discrete time sequences and the corresponding fast algorithms for processing these sequences *Digital Signal Processing Algorithms* examines three of the most common computational tasks that occur in digital signal processing namely cyclic convolution acyclic convolution and discrete Fourier transformation The application of number theory to deriving fast and efficient algorithms for these three and related computationally intensive tasks is clearly discussed and illustrated with examples Its comprehensive coverage of digital signal processing computer arithmetic and coding theory makes *Digital Signal Processing Algorithms* an excellent reference for practicing engineers The authors intent to demystify the abstract nature of number theory and the related algebra is evident throughout the text providing clear and precise coverage of the quickly evolving field of digital signal processing **Proceedings of the IEEE 1992 National Aerospace and Electronics Conference, NAECON 1992** ,1992 *International Aerospace Abstracts* ,1986 *INIS Atomindex* ,1988
