Baseball Hacks Joseph Adler, 2006-01-31 *Baseball Hacks* isn't your typical baseball book; it's a book about how to watch, research, and understand baseball. It's an instruction manual for the free baseball databases. It's a cookbook for baseball research. Every part of this book is designed to teach baseball fans how to do something. In short, it's a how-to book, one that will increase your enjoyment and knowledge of the game. So much of the way baseball is played today hinges upon interpreting statistical data. Players are acquired based on their performance in statistical categories that ownership deems most important. Managers make in-game decisions based not on instincts but on probability: how a particular batter might fare against left-handed pitching, for instance. The goal of this unique book is to show fans all the baseball-related stuff that they can do for free or close to free. Just as open-source projects have made great software freely available, collaborative projects such as Retrosheet and Baseball DataBank have made great data freely available. You can use these data sources to research your favorite players, win your fantasy league, or appreciate the game of baseball even more than you do now. *Baseball Hacks* shows how easy it is to get data, process it, and use it to truly understand baseball. The book lists a number of sources for current and historical baseball data and explains how to load it into a database for analysis. It then introduces several powerful statistical tools for understanding data and forecasting results. For the uninitiated baseball fan, author Joseph Adler walks readers through the core statistical categories for hitters (batting average, on-base percentage, etc.), pitchers (earned run average, strikeout-to-walk ratio, etc.), and fielders (putouts, errors, etc.). He then extrapolates upon these numbers to examine more advanced data groups like career averages, team stats, season-by-season comparisons, and more. Whether you're a mathematician, scientist, or season ticket holder to your favorite team, *Baseball Hacks* is sure to have something for you. Advance praise for *Baseball Hacks*: *Baseball Hacks* is the best book ever written for understanding and practicing baseball analytics. A must-read for baseball professionals and enthusiasts alike. Ari Kaplan, database consultant to the Montreal Expos, San Diego Padres, and Baltimore Orioles. The game was born in the 19th century, but the passion for its analysis continues to grow into the 21st. In *Baseball Hacks*, Joe Adler not only demonstrates that the latest data mining technologies have useful application to the study of baseball statistics; he also teaches the reader how to do the analysis himself, arming the dedicated baseball fan with tools to take his understanding of the game to a higher level. Mark E. Johnson, Ph.D., Founder, SportMetrika, Inc., and Baseball Analyst for the 2004 St. Louis Cardinals.

Composing for Silent Film Jack Curtis Dubowsky, 2024-04-10 *Composing for Silent Film* offers insight, information, and techniques for contemporary composition, arrangement, and live score performance for period silent film. A specialized music composition guide, this book complements existing film scoring and contemporary music composition texts. This book helps today's composers better understand and correctly interpret period silent film and to create and perform live scores that align with films' original intentions, so that audiences notice and grasp fine points of the original film. *Composing for Silent Film* analyzes period silent film and its conventions from Delsarte

acting gestures to period fascinations and subtexts As a practical composition text it weighs varying approaches including improvisation through scoring mickey mousing handling dialogue and dividing roles amongst players It steers composers towards informed understanding of silent film and encourages them to deploy contemporary styles and techniques in exciting ways For clarity and concision examples are limited to nine canonical silents Metropolis Dr Jekyll and Mr Hyde The Mark of Zorro Sunrise A Song of Two Humans The Black Pirate Nosferatu The Phantom Carriage Daisy Doodad s Dial and The Golem
