Christian Wilken, 2025-03-10 In *Reading Lovecraft in the Anthropocene: A New Dark Age* the intersection of environmental philosophical and literary discourses is explored through the lens of H P Lovecraft's weird fiction. This study examines the convergence of three critical phenomena: the widespread recognition of the Anthropocene as a marker of human impact on the planet, the rise of speculative realism and Object Oriented Ontology (OOO) in contemporary philosophy, and the growing cultural and academic influence of Lovecraft's work. Divided into three parts: Seeds, Crops, and Excrescence, the book traces Lovecraft's gothic and decadent influences, examines materiality and its transcendence in weird fiction, and considers the posthuman and postsecular dimensions of his narratives. Through this, the study highlights Lovecraft's role in navigating the challenges of a secular, disenchanted world, offering a dark enchantment that echoes current philosophical concerns. This work ultimately synthesizes discussions on weird fiction as a response to the existential and ecological crises of the Anthropocene, addressing issues like correlationism, anthropocentrism, and our fraught relationship with the natural world.
