## Identify the industry Case Study Solution

The second organization mentioned in the exhibit is known to a liquor producer and distributor. As the company has gross profit of about 69.7 percent of the sales. The highest percentage of inventories i.e. 21.6 percent is suggested the organization to be the liquor producer and distributor with high general and administrative expenses i.e. 37.2 percent suggesting that the organization deals in both production and distribution of liquor product. Similarly, the high value of long-term debt i.e. 22.1 percent of total liabilities and net worth. The assets are primarily financed by the long-term debt and retained earnings like other manufacturing businesses. The company has 1.80 value for the acid test ratio, suggesting that the organization indicated high inventories value.

The third corporation tends to be the manufacturer of semiconductors. The cost of goods sold is known to be 25.2 percent as well as selling, general and administrative expenditure is also 33.1 percent resulting in net income of about 21 percent of sales. Due to the reason, the semiconductor manufacturing corporation generally with sufficient values of inventory i.e. 5.3 percent. They also have high value of property, plant and equipment which suggests the requirement of investment i.e. 79.8 percent of net plant, property and equipment. The retained earnings have known to be 39.3 percent of total liabilities and net worth. The assets of the organization are barely financing the liabilities with respect to the current and acid test ratio i.e. 2.32 and 1.67 respectively.

The fourth corporation is expected to be Pharmaceutical Corporation. It tends to be manufacturing firm as demonstrated by the financial data. As there is always a requirement of high investment in pharmaceutical organizations. 29.6 percent of sales is referred to as operating incomes excluding depreciation. Retained earnings of the organization i.e. about 37 percent is primarily for the investment purpose after the complete payment of long-term debt. As the organization is known to have a long-term debt of about 14.7 percent. Although, the company has feasible liquidity ratio but coverage ratios were not disclosed.

The fifth firm is evaluated to be the computer software organization with relatively low cost of goods sold i.e. 15.6 percent. This clearly demonstrates that the organization is not manufacturing firm but a service provider. This is, therefore, confirmed on the basis of high selling, general and administrative expense i.e. 54.8 percent. As a service provider firm, the organization is liable to pay higher tax to the state government which were not disclosed in the financial data provided in the case study for analysis.

Company 6 is thought to be large integrated Oil and Gas company. With the fact, Oil and Gas Company is expected to have a high cost of goods sold with a less value of net income. In context to the income statement provided in the case, it can be significantly considered that Oil and Gas Company is likely to have increased value of finished goods and higher equipment, plants and property. Therefore, the cost of the goods sold is 77.3 percent which is quite high value with the net income of about 2.6 percent illustrating low profit for the organization. Additionally, in the liabilities section, the long-term debt of the organization is 14.7 percent of total liabilities and equity which is considered high suggesting that in starting-up of the corporation money was borrowed. On the other hand, the capital surplus is low i.e. 6.5 percent with positive retained earnings of about 30.7 percent demonstrating that it is not facing losses over a period of three years.

Evaluation of company seven in consideration with its financial data shows it to be a mobile phone service provider. The organization is known to have a high value of receivables i.e. 55.1 percent of total asset which suggest that the corporation had a belief in credit sales. The corporation have relatively low value of equipment, plant and property i.e. 0.8 percent defining the probability of the organization of being a service corporation rather being a manufacturing one as it primarily

*Greener Products* Al Iannuzzi, 2024-08-21 Sustainability and its competitive advantage are the goals of every company and any brand that wants to stay successful in the marketplace. Customers also gravitate to brands that manage sustainability issues well. *Greener Products: The Making and Marketing of Sustainable Brands* written by a renowned sustainability expert continues to address the latest developments in the extremely fast moving field of sustainability. The third edition is thoroughly updated, introduces new case studies, and includes a new chapter on green marketing. With over 40 case studies, it explores the best practices of leading global companies and helps readers learn what it is that makes them successful. New in the Third Edition: Presents in a practical way the best practices of sustainable brands in a global economy; Addresses the most current sustainability topics like circular economy, plastics in the environment, biodiversity, climate change, green chemistry, etc; Includes current marketing information on consumer trends to purchase greener products; Incorporates the latest pressures on companies to address sustainability, retailer programs, business to business expectations, ESG raters, rankers, and stock funds; Covers best practices of companies from various industries on how to make and market greener products; Provides current tools for making products more sustainable and methods on how to market sustainable improvements; Includes lecture slides available upon request for use in the classroom. This book serves senior undergraduate and graduate students in programs focused on sustainability as well as academics and corporate sustainability leaders. The previous versions have been used to teach courses on sustainability, product improvement, introduction to sustainability, green marketing, and sustainability and sustainability policy. Any university that teaches a course on sustainability and any company or individual interested in making and marketing more sustainable products would benefit from the new edition of this book.

**The Invisible Threads of Marketing** Shivam Singh, 2025-08-27 *The Invisible Threads of Marketing* is a strategic, story-driven guide to building brands that resonate in today's complex marketplace. Blending sharp insights with uniquely Indian metaphors from nukkad natak to ant colonies, this book simplifies the chaos of marketing into clear, actionable ideas. Across fifteen fast-paced chapters, it covers everything from consumer psychology and segmentation to branding, pricing, innovation, content, and digital strategy. Designed for marketers, entrepreneurs, and curious learners alike, it draws from real-world scenarios and cultural nuances to help you connect the dots between timeless human behaviour and modern marketing techniques. Whether you're planning a campaign, launching a product, or sharpening your brand's purpose, this book equips you with practical frameworks, fresh perspectives, and thought-provoking questions. It's not about textbook jargon; it's about what actually works in the field. Discover the invisible threads that turn ideas into impact and brands into belief systems.

**Quality Management in Engineering** Jong S. Lim, 2019-07-30 This book introduces fundamental, advanced, and future-oriented scientific quality management methods for the engineering and manufacturing industries. It presents new knowledge and experiences in the manufacturing industry with real-world case studies. It introduces Quality 4.0 with Industry 4.0.

including quality engineering tools for software quality and offers lean quality management methods for lean manufacturing. It also bridges the gap between quality management and quality engineering and offers a scientific methodology for problem solving and prevention. The methods, techniques, templates, and processes introduced in this book can be utilized in various areas in industry from product engineering to manufacturing and shop floor management. This book will be of interest to manufacturing industry leaders and managers who do not require in-depth engineering knowledge. It will also be helpful to engineers in design and suppliers in management and manufacturing, all who have daily concerns with project and quality management. Students in business and engineering programs may also find this book useful as they prepare for careers in the engineering and manufacturing industries. Presents new knowledge and experiences in the manufacturing industry with real world case studies. Introduces quality engineering methods for software development. Introduces Quality 4.0 with Industry 4.0. Offers lean quality management methods for lean manufacturing. Bridges the gap between quality management methods and quality engineering. Provides scientific methodology for product planning, problem solving, and prevention management. Includes forms, templates, and tools that can be used conveniently in the field.

*The Evolution of Tiger Management* Martin Hemmert, 2017-10-19. Throughout the last several decades, Korean companies have become strong global competitors in a wide range of manufacturing industries. How did they achieve this exceptional performance? *The Evolution of Tiger Management* uncovers the secret of their success through a comprehensive analysis of Korean style management. It explains how it has developed, why it works so well, what non-Koreans can learn from it, and what Korean companies need to do to stay competitive in the future. This book is an extended and significantly updated new edition of *Tiger Management: Korean companies on world markets* (Routledge, 2012). It tells the remarkable stories of how Korean firms seemingly coming from nowhere have successfully challenged their Western and Japanese competitors globally. A new chapter highlights the rise of Korean venture firms and start-ups. Next, the essence of *Tiger Management* is analyzed by showing that it consists of an effective combination of business strategy, leadership, and human resource management practices. Finally, the evolution and future of *Tiger Management* is discussed by showing how Korean companies have adapted to changes at home and abroad, and how non-Korean companies can adopt *Tiger Management*. A new final chapter discusses the way forward for Korean companies.

*Innovation and Strategy* Rajan Varadarajan, Satish Jayachandran, Naresh K. Malhotra, 2018-06-29. This volume focuses on substantive issues in innovation, marketing strategy, and the nexus of innovation and marketing strategy.

*Innovation Through Information Systems* Frederik Ahlemann, Reinhard Schütte, Stefan Stieglitz, 2021-10-15. This book presents the current state of research in information systems and digital transformation. Due to the global trend of digitalization and the impact of the Covid-19 pandemic, the need for innovative, high-quality research on information systems is higher than ever. In this context, the book covers a wide range of topics such as digital innovation, business analytics, artificial intelligence, and IT strategy, which affect companies, individuals, and societies. This volume gathers the revised and

*Hitotsubashi Journal of Economics*, 2008

*Technology Transfer and International Production* Jin W. Cyhn, 2002

This book analyses the technology development efforts of Korea's electronics industry the country's largest exporter It asks how the Korean electronics industry was able to develop both in terms of production and technology despite low inflows of licensing and foreign direct investments The book argues that the key to its spectacular growth has been through its participation and learning from an inter firm arrangement called original equipment manufacturing arrangement OEM A number of firm level case studies on the Korean electronics industry support this argument The role of the government especially related to its technology policy has also been analysed The government was effective in providing financial incentives for the firms technological upgrading efforts but its supplying of direct technological assistance had limited success Overall this book argues that contrary to many previous studies the role of multinational enterprises has been significant in the development of Korea's electronics industry and that they have acted as a technological tutor for Korea through OEM

Foreign Investment in Latin America and the Caribbean 2006 United Nations. Economic Commission for Latin America and the Caribbean, 2007 This is the latest in a series of annual reports on recent trends and developments in relation to foreign direct investment FDI and investment strategies in Latin America and the Caribbean region The main message of this year's report is that active and integrated FDI attraction policies linked to national development strategies are necessary to secure quality FDI These lessons are drawn from policy practices in the more successful European and Asian countries which contrast with the more passive and disconnected FDI attraction policies evident in Latin America and the Caribbean The 2006 report also contains chapters that analyse the experiences of two relatively small investor countries in Latin America and the Caribbean the Republic of Korea and Portugal
