

MUSICAL ANALYSIS

Directions: Students are to choose a song that conveys a particular message or expresses a certain feeling. Students may choose any song, but they should choose songs that allow for deep and meaningful interpretation or analysis. Students should not choose songs that are simple and do not have a deep meaning under the surface.

After choosing a song, students will analyze the song. Students must give a historical background on the writer, singer, and/or band that performed the song. Students must make sure that they highlight anything that would add meaning to their songs. Students may even want to explain historical or cultural events that are occurring around the time the song was written, since many songs are a commentary on social trends.

Look for the different aesthetic languages used in the song and fill out the following format.

TITLE:	Who Says	
AUTHOR:	Selena Gomez	
BACKGROUND:	This song was written back in March 2011, as a part of Selena's third album "When the sun goes down." According to Selena the song was intended to inspire people and fire back at the "haters" particularly those involved in cyber bullying. This song was later called fun and empowering.	
EMOTIONS	<p>HOPE</p> <p>"I wouldn't wanna be anybody else" She shows she's joyful and happy because the tempo is fast and her voice is very cheerful with a happy beat. The lyrics and tempo are very outgoing which symbolizes the thought of being happy and having hope. The song just seems very inspiring when you first listen to it because no matter what the lyrics speak, her voice stays fast and it sounds happy.</p>

is also made of the fact that even in small cities one may have the privilege of listening to the greatest artists including such birds of passage as von Bülow Rubinstein and Albert Klindworth Rosenthal Essipoff and Aus der Ohe But in truth considerable of this heavy cannonading is so to say fired over the heads of the average student Every embryo pianist is improved by hearing a recital by any of these artists but in the majority of cases they should descend somewhat from their lofty pedestal to the common earth upon which the student stands if others than advanced students are to be hit by their artistic missiles But it is often impossible for these distinguished virtuosi who in addition to their inherent gifts have enjoyed every possible advantage to comprehend the chaotic state of musical culture outside the radius of our large cities The text books the laws of the country which permit the titles of Professor and Doctor to be bestowed upon persons who are ignorant of the very nomenclature of music and that spirit of American impatience which seeks to acquire everything by a patent process these are responsible for the present uncultivated state of musical taste About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Essays in Musical Analysis, 1936 **The Piece as a Whole** Hugh Aitken, 1997-10-30 Designed to serve music students at the college level this informal approach to music theory relates the technical aspects of music with the expressive character of the art The approach is holistic in the sense that it focuses on the interrelationships between the piece as heard by a socially conditioned listener and the notated performed score it aims to bridge the gap between the technical and expressive aspects of music The composers addressed are Bach Mozart Beethoven Chopin Schumann Brahms Wagner Debussy and Schoenberg There are separate chapters on the problems of meaning in music and on the interdependence of aesthetic and ethical value judgments This novel and exciting approach to music theory will be a welcome addition to the musical analysis literature

Cope,2009-06-01 Today's computers provide music theorists with unprecedented opportunities to analyze music more quickly and accurately than ever before. Where analysis once required several weeks or even months to complete, often replete with human errors, computers now provide the means to accomplish these same analyses in a fraction of the time and with far more accuracy. However, while such computer music analyses represent significant improvements in the field, computational analyses using traditional approaches by themselves do not constitute the true innovations in music theory that computers offer. In *Hidden Structure: Music Analysis Using Computers*, David Cope introduces a series of analytical processes that, by virtue of their concept and design, can be better and in some cases only accomplished by computer programs, thereby presenting unique opportunities for music theorists to understand more thoroughly the various kinds of music they study. Following the introductory chapter that covers several important premises, *Hidden Structure* focuses on several unique approaches to music analysis offered by computer programs. While these unique approaches do not represent an all-encompassing and integrated global theory of music analysis, they do represent significantly more than a compilation of loosely related computer program descriptions. For example, Chapter 5 on function in post-tonal music firmly depends on the scalar foundations presented in chapter 4. Likewise, chapter 7 presents a multi-tiered approach to musical analysis that builds on the material found in all of the preceding chapters. In short, *Hidden Structure* uniquely offers an integrated view of computer music analysis for today's musicians.

Reification and the Aesthetics of Music Jonathan Lewis,2015-11-19 This innovative study re-evaluates the philosophical significance of aesthetics in the context of contemporary debates on the nature of philosophy. Lewis's main argument is that contemporary conceptions of meaning and truth have been reified and that aesthetics is able to articulate why this is the case, with important consequences for understanding the horizons and nature of philosophical inquiry. *Reification and the Aesthetics of*
