Background Modeling And Foreground Detection For Video Surveillance:

Background Modeling and Foreground Detection for Video Surveillance Thierry Bouwmans, Fatih Porikli, Benjamin Höferlin, Antoine Vacavant, 2014-07-25 Background modeling and foreground detection are important steps in video processing used to detect robustly moving objects in challenging environments This requires effective methods for dealing with dynamic backgrounds and illumination changes as well as algorithms that must meet real time and low memory requirements Incorporating both established and new ideas Background Modeling and Foreground Detection for Video Surveillance provides a complete overview of the concepts algorithms and applications related to background modeling and foreground detection Leaders in the field address a wide range of challenges including camera jitter and background subtraction The book presents the top methods and algorithms for detecting moving objects in video surveillance It covers statistical models clustering models neural networks and fuzzy models It also addresses sensors hardware and implementation issues and discusses the resources and datasets required for evaluating and comparing background subtraction algorithms The datasets and codes used in the text along with links to software demonstrations are available on the book s website A one stop resource on up to date models algorithms implementations and benchmarking techniques this book helps researchers and industry developers understand how to apply background models and foreground detection methods to video surveillance and related areas such as optical motion capture multimedia applications teleconferencing video editing and human computer interfaces It can also be used in graduate courses on computer vision image processing real time architecture machine learning or data mining

[Computer Vision and Internet of Things](#) Lavanya Sharma, Mukesh Carpenter, 2022-05-19 Computer Vision and Internet of Things Technologies and Applications explores the utilization of Internet of Things IoT with computer vision and its underlying technologies in different applications areas Using a series of present and future applications including business insights indoor outdoor securities smart grids human detection and tracking intelligent traffic monitoring e health departments and medical imaging this book focuses on providing a detailed description of the utilization of IoT with computer vision and its underlying technologies in critical application areas such as smart grids emergency departments intelligent traffic cams insurance and the automotive industry Key Features Covers the challenging issues related to sensors detection and tracking of moving objects with solutions to handle relevant challenges Describes the latest technological advances in IoT and computer vision with their implementations Combines image processing and analysis into a unified framework to understand both IOT and computer vision applications Explores mining and tracking of motion based object data such as trajectory prediction and prediction of a particular location of object data and their critical applications Provides novel solutions for medical imaging skin lesion detection cancer detection enhancement techniques for MRI images and automated disease prediction This book is primarily aimed at graduates and researchers working in the areas of IoT computer vision big data cloud computing and remote sensing It is also an ideal

resource for IT professionals and technology developers **From Visual Surveillance to Internet of Things** Lavanya Sharma, Pradeep K. Garg, 2019-10-16 *From Visual Surveillance to Internet of Things Technology and Applications* is an invaluable resource for students, academicians, and researchers to explore the utilization of Internet of Things with visual surveillance and its underlying technologies in different application areas. Using a series of present and future applications, business insights, indoor/outdoor securities, smart grids, human detection and tracking, intelligent traffic monitoring, e-health department, and many more, this book will support readers to obtain a deeper knowledge in implementing IoT with visual surveillance. The book offers comprehensive coverage of the most essential topics including: The rise of machines and communications to IoT, 3G/5G Tools and technologies of IoT with visual surveillance, IoT with visual surveillance for real-time applications, IoT architectures, Challenging issues and novel solutions for realistic applications, Mining and tracking of motion-based object data, Image processing and analysis into the unified framework to understand both IOT and computer vision applications. This book will be an ideal resource for IT professionals, researchers, under or post-graduate students, practitioners, and technology developers who are interested in gaining a deeper knowledge in implementing IoT with visual surveillance, critical applications, domains, technologies, and solutions to handle relevant challenges. Dr. Lavanya Sharma is an Assistant Professor in the Amity Institute of Information Technology at Amity University UP Noida, India. She is a recipient of several prestigious awards during her academic career. She is an active, nationally recognized researcher who has published numerous papers in her field. She has contributed as an Organizing Committee member and session chair at Springer and IEEE conferences. Prof. Pradeep K. Garg worked as a Vice-Chancellor, Uttarakhand Technical University, Dehradun. Presently, he is working in the department of Civil Engineering, IIT Roorkee, as a professor. Prof. Garg has published more than 300 technical papers in national and international conferences and journals. He has completed 26 research projects funded by various government agencies, guided 27 PhD candidates, and provided technical services to 84 consultancy projects on various aspects of Civil Engineering.

Towards Smart World Lavanya Sharma, 2020-12-13 *Towards Smart World: Homes to Cities Using Internet of Things* provides an overview of basic concepts from the rising of machines and communication to IoT for making cities smart, real-time applications, domains, related technologies, and their possible solutions for handling relevant challenges. This book highlights the utilization of IoT for making cities smart and its underlying technologies in real-time application areas such as emergency departments, intelligent traffic systems, indoor and outdoor securities, automotive industries, environmental monitoring, business, entrepreneurship, facial recognition, and motion-based object detection. Features: The book covers the challenging issues related to sensors, detection and tracking of moving objects, and solutions to handle relevant challenges. It contains the most recent research analysis in the domain of communications, signal processing, and computing sciences for facilitating smart homes, buildings, environmental conditions, and cities. It presents the readers with practical approaches and future direction for using IoT in smart cities and discusses how it deals with human dynamics.

the ecosystem and social objects and their relation It describes the latest technological advances in IoT and visual surveillance with their implementations This book is an ideal resource for IT professionals researchers undergraduate or postgraduate students practitioners and technology developers who are interested in gaining deeper knowledge and implementing IoT for smart cities real time applications areas and technologies and a possible set of solutions to handle relevant challenges Dr Lavanya Sharma is an Assistant Professor in the Amity Institute of Information Technology at Amity University UP Noida India She has been a recipient of several prestigious awards during her academic career She is an active nationally recognized researcher who has published numerous papers in her field
