Roberts, 2008-03-14 Focused on the undergraduate audience Chemical Reaction Engineering provides students with complete coverage of the fundamentals including in depth coverage of chemical kinetics By introducing heterogeneous catalysis early in the book the text gives students the knowledge they need to solve real chemistry and industrial problems An emphasis on problem solving and numerical techniques ensures students learn and practice the skills they will need later on whether for industry or graduate work

Turbulent Mixing and Chemical Reactions Jerzy Bałdyga, John R. Bourne, 1999-03-12 Turbulent Mixing and Chemical Reactions Jerzy Bałdyga Warsaw University of Technology Poland John R Bourne Visiting Professor University of Birmingham UK and Emeritus Professor ETH Zurich Switzerland The way in which reagents are mixed can greatly influence the yield and range of products formed by fast multiple chemical reactions Understanding this phenomenon enables chemists to carry out reactions more selectively make better use of raw materials and simplify product workup and separation Turbulent Mixing and Chemical Reactions presents a balanced treatment of the connection between mixing and reaction It contains theoretical aspects experimental methods and expected results as well as worked examples to illustrate problem solving This book will be of interest to all scientists involved in chemical engineering physical chemistry and synthetic chemists in the fine chemical and pharmaceuticals industry

Chemical Reactions Kaufman George Falk,1920 Rates and Mechanisms of Chemical Reactions W. C. Gardiner (Jr.),William Cecil Gardiner,1969 **Thermal Hazards of Chemical Reactions** Theodor Grewer,1994 Hardbound Exothermic reactions used for the production of chemicals present a hazard if they proceed without control Runaway reactions can result in a blow off of the reactor top and an emission of reactants and products possibly followed by a gas explosion Undesired exothermic reactions initiated during production purification or storage by excessive temperatures or other causes have similar destructive effects even if the origin is different Although the hazards connected with exothermic reactions have been known since the inception of the chemical industry a systematic knowledge of the possible effects has only been developed in the last 25 years A number of incidents in the chemical industry which have been investigated by groups of experts from various companies have promoted the understanding of these hazards The author has investigated incidents in plants and tested experimental methods for more than 20 years In particular he was inter
