Ensminger, 1993-11-09 Foods and Nutrition Encyclopedia Second Edition is the updated expanded version of what has been described as a monumental classic work This new edition contains more than 2 400 pages 1 692 illustrations 96 of which are full color photographs 2 800 entries topics and 463 tables including a table of 2 500 food compositions A comprehensive index enables you to find information quickly and easily *Animal Nutrition Science* Gordon McL. Dryden, Food Composition and Analysis Leonard W. Aurand, 2013-11-11 There is an increasing demand for food technologists who are not only familiar with the practical aspects of food processing and merchandising but who are also well grounded in chemistry as it relates to the food industry Thus in the training of food technologists there is a need for a textbook that combines both lecture material and laboratory experiments involving the major classes of foodstuffs and food additives To meet this need this book was written In addition the book is a reference text for those engaged in research and technical work in the various segments of the food industry The chemistry of representative classes of foodstuffs is considered with respect to food composition effects of processing on composition food deterioration food preservation and food additives Standards of identity for a number of the food products as prescribed by law are given The food products selected from each class of foodstuffs for laboratory experimentation are not necessarily the most important economically or the most widely used However the experimental methods and techniques utilized are applicable to the other products of that class of foodstuff Typical food adjuncts and additives are discussed in relation to their use in food products together with the laws regulating their usage Laboratory experiments are given for the qualitative identification and quantitative estimation of many of these substances **Handbook of Food Science, Technology, and Engineering - 4 Volume Set** Y. H. Hui, Frank Sherkat, 2005-12-19 Advances in food science technology and engineering are occurring at such a rapid rate that obtaining current detailed information is challenging at best While almost everyone engaged in these disciplines has accumulated a vast variety of data over time an organized comprehensive resource containing this data would be invaluable to have **The Foods: Their Composition and Analysis** Alexander Wynter Blyth, 1888 *Bulletin of the Agricultural Experiment Station of the University of Tennessee, State Agricultural and Mechanical College*, 1888 *Bulletin*, 1891 **The Journal of Industrial and Engineering Chemistry**, 1918 *General Catalogue* Massachusetts Institute of Technology, 1930 *Bulletin - University of Tennessee, Agricultural Experiment Station* University of Tennessee, Knoxville.
