## **The Future Of Spacetime:**

**The Future of Spacetime** Stephen Hawking,2002 Where the science of black holes gravitational waves and time travel will likely lead us as reported by spacetime s most important theoreticians and observers

**The Future of Post-human Space-time** Peter Baofu,2006 Contrary to the conventional wisdom held by many in much of human history in this book Peter Baofu here proposes what he calls the perspectival theory of space time According to this theory there are multiple perspectives of space and time in society culture the mind and nature all of which are subject to the regression progression principle in existential dialectics These perspectives exist in society culture the mind and nature with good reasons being subject to the symmetry asymmetry principle in existential dialectics and with some being more successful and hegemonic dominant than others Furthermore and more importantly in the long haul space and time as humans have known them will end and will eventually be altered by post humans in different forms be they here in this universe or in multiverses subject to the change constancy principle in existential dialectics

**Objective Becoming** Bradford Skow,2015-01-29 Bradford Skow presents an original defense of the block universe theory of time often said to be a theory according to which time does not pass Along the way he provides in depth discussions of alternative theories of time including those in which there is robust passage of time or objective becoming presentism the moving spotlight theory of time the growing block theory of time and the branching time theory of time Skow explains why the moving spotlight theory is the best of these arguments and rebuts several popular arguments against the thesis that time passes He surveys the problems that the special theory of relativity has been thought to raise for objective becoming and suggests ways in which fans of objective becoming may reconcile their view with relativistic physics The last third of the book aims to clarify and evaluate the argument that we should believe that time passes because somehow the passage of time is given to us in experience He isolates three separate arguments this idea suggests and explains why they fail

**Space, Time, and Deity** Samuel Alexander,1920 *The Future of Aesthetic Experience*

**Experience** Peter Baofu,2007 Contrary to the conventional wisdom held by many Dr Peter Baofu argues that the current popularity of postmodernism in the humanities especially though not exclusively in relation to the arts will not last as it constitutes an aesthetic fad in this day and age of postmodernity This thesis has important implications for understanding beauty ugliness and other aesthetic categories be the era in the past present or future to the extent that the current theoretical debate on aesthetic experience is as much misleading as obsolete The current debate also obscures something more tremendous in the long run in relation to the emergence of what Dr Baofu originally proposes as the great transformations of aesthetic experience in the coming future that humans have never known both here on Earth and later in deep space in accordance to the five theses of his oetransformative theory of aesthetic experience To understand this the book is organized into four major parts i e in relation to nature the mind culture and society

**The Future of Post-human Organization** Peter Baofu,2009 The aim of this book is to provide an alternative way to understand the nature of

organizations in special relation to communication decision making and leadership *Free Notes on Herbert Spencer's First Principles with Suggestions Regarding Space, Time, and Force*, 1878 **The Future of Post-human Mathematical Logic** Peter Baofu, 2008 Why should mathematical logic be grounded on the basis of some formal requirements in the way that it has been developed since its classical emergence as a hybrid field of mathematics and logic in the 19th century or earlier Contrary to conventional wisdom the foundation of mathematic logic has been grounded on some false or dogmatic assumptions which have much impoverished the pursuit of knowledge This is not to say that mathematical logic has been useless Quite on the contrary it has been quite influential in shaping the way that reality is to be understood in numerous fields of knowledge by learning from the mathematical study of logic and its reverse the logical study of mathematics In the final analysis the future of mathematical logic will depend on how its foundational crisis is to be resolved and the contrastive theory of rationality in this book is to precisely show how and why it can be done by taking a contrastive turn subject to the constraints imposed upon by existential dialectic principles at the ontological level to avoid any reductionistic fallacy and other ones like the perspectives of culture society nature and the mind The contrastive theory of rationality thus shows a better way to ground mathematical logic beyond both classical and non classical logics for the future advancement of knowledge and if true will alter the way of how mathematical logic is to be understood with its enormous implications for the future of knowledge and its post human fate **Seeing the Future** Dame Christabel Pankhurst, 1929 **The Journal of Philosophy**, 1922 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 Relativity Demystified David McMahon, Paul M. Alsing, 2005-12-23 In Relativity Demystified a physicist explains Einstein's theory of relativity in layman's terms minus heavy duty discussion or formal mathematics Author David McMahon gradually builds up readers practical skills to a point where they can eventually solve real problems in the field of general relativity The book offers examples that vary in complexity from textbook like problems to real world situations from actual current research Relativity Demystified also focused on quick definitions and demonstrations of procedures needed to solve problems Cosmic Evolution John E. Boodin, 1925 **Light**, 1930 Science, 1929 Vols for 1911-13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018-0120 1st-15th meeting *The Future of Post-human Sexuality* Peter Baofu, 2010 What precisely resides in oesexuality which warrants the popular discourse on sexuality as a part of our world freedom or something as an inspiring source for our own creation of new forms of relationships or new forms of love never before possible in human history This popular treatment of sexual freedom has become so politically correct in this day and age of ours that it fast degenerates into a seductive ideology which has impoverished our understanding of sexuality by blinding us from its dark sides Contrary to this intoxicating conventional wisdom the dark sides of this seductive ideology have yet to be systematically understood and that its very creative freedom is neither possible nor desirable to the extent that its advocates would like us to believe Of course this is not to suggest that sexuality should not be

about freedom nor creativity or that the literature in sexual studies and other related fields like gender studies queer studies and cultural studies for example should be ignored because of their scholarly nonsense Needless to say neither of these two extreme views is reasonable either Instead the purpose of this book is to provide an alternative better way to understand the nature of sexuality in special relation to the sexual body and spirit in conjunction with the mind while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other This seminal project if successful will fundamentally change the way that we think about the nature of sexuality from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its oepost human fate
