The square-to-triangle puzzle was created, as the footnote on page 23 states, by Henry Dudeney, England's greatest innovator of mathematical puzzles. In *The Canterbury Puzzles*, he told of exhibiting it to the Royal Society of London in 1905 in the form of a model made of four mahogany pieces hinged together in a chain. When closed in one direction, the pieces formed the triangle and, when closed in the other direction, they formed the square. The version illustrated on page 23 of the text is slightly altered to make it easier for beginning geometry students to draw. Martin Gardner gives directions for constructing the figure exactly on pages 33 and 34 of *The 2nd Scientific American Book of Mathematical Puzzles and Diversions* (Simon & Schuster, 1961).
