#### NAME

lisp - lisp interpreter

#### SYNOPSIS

lisp

#### DESCRIPTION

Lisp is a lisp interpreter for a dialect which closely resembles MIT's MACLISP. This lisp, known as FRANZ LISP, features an I/O facility which allows the user to change the input and output syntax, add macro characters, and maintain compatibility with upper-case only lisp systems; infinite precision integer arithmetic, and an error facility which allows the user to trap system errors in many different ways. Interpreted functions may be mixed with code compiled by liszt(1) and both may be debugged using the "Joseph Lister" trace package. A lisp containing compiled and interpreted code may be dumped into a file for later use.

Speech and Language Processing Dan Jurafsky, James H. Martin, 2009 This book takes an empirical approach to language processing based on applying statistical and other machine learning algorithms to large corpora Methodology boxes are included in each chapter Each chapter is built around one or more worked examples to demonstrate the main idea of the chapter Covers the fundamental algorithms of various fields whether originally proposed for spoken or written language to demonstrate how the same algorithm can be used for speech recognition and word sense disambiguation Emphasis on web and other practical applications Emphasis on scientific evaluation Useful as a reference for professionals in any of the areas of speech and

Abrahams,Daniel J. Edwards,Timothy P. Hart,Michael I. Levin,1962-08-15 The manual describes LISP a formal mathematical language LISP differs from most programming languages in three important ways The first way is in the nature of the data The LISP language is designed primarily for symbolic data processing used for symbolic calculations in differential and integral calculus electrical circuit theory mathematical logic game playing and other fields of artificial intelligence The manual describes LISP a formal mathematical language LISP differs from most programming languages in three important ways The first way is in the nature of the data In the LISP language all data are in the form of symbolic expressions usually referred to as S expressions of indefinite length and which have a branching tree type of structure so that significant subexpressions can be readily isolated In the LISP system the bulk of the available memory is used for storing S expressions in the form of list structures The second distinction is that the LISP language is the source language itself which specifies in what way the S expressions are to be processed Third LISP can interpret and execute programs written in the form of S expressions Thus like machine language and unlike most other high level languages it can be used to generate programs for further executions

**Land of Lisp** Conrad Barski,2010-10-15 Lisp has been hailed as the world s most powerful programming language but its cryptic syntax and academic reputation can be enough to scare off even experienced programmers Those dark days are finally over Land of Lisp brings the power of functional programming to the people With his brilliantly quirky comics and out of this world games longtime Lisper Conrad Barski teaches you the mysteries of Common Lisp You ll start with the basics like list manipulation I O and recursion then move on to more complex topics like macros higher order programming and domain specific languages Then when your brain overheats you can kick back with an action packed comic book interlude Along the way you ll create and play games like Wizard Adventure a text adventure with a whiskey soaked twist and Grand Theft Wumpus the most violent version of Hunt the Wumpus the world has ever seen You ll learn to Master the quirks of Lisp s syntax and semantics Write concise and elegant functional programs Use macros create domain specific languages and learn other advanced Lisp techniques Create your own web server and use it to play browser based games Put your Lisp skills to the test by writing brain melting games like Dice of Doom and Orc Battle With Land of Lisp the power of functional programming is yours to wield      **Common LISP** Guy Steele,1990 The defacto standard a must have for all LISP
