Architectural Programming: Creative Techniques for Design Professionals Robert R. Kumlín, 1995-05-22 Architectural programming is the key to successful design It is the crucial process of gathering

organizing and assessing a client's building use information. This process includes design concepts and program objectives, staff and employee projections, current and future space requirements, adjacencies and relationships, equipment and utility requirements, project cost, and more. This unique book and diskette provide architects, engineers, facilities managers, corporate and institutional administrators, and others with an effective method for gathering and assessing data needed to successfully design virtually any type of building, from office towers and educational facilities to laboratories and medical facilities.

Architectural Research Addressing Societal Challenges Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Joana Pestana Lages, Susana Couceiro da Costa, 2019-08-08. The escalating interdependency of nations drives global geopolitics to shift ever more quickly. Societies seem unable to control any change that affects their cities, whether positively or negatively. Challenges are global, but solutions need to be implemented locally. How can architectural research contribute to the future of our changing society? How has it contributed in the past? The theme of the 10th EAAE ARCC International Conference, Architectural Research Addressing Societal Challenges, was set to address these questions. This book, *Architectural Research Addressing Societal Challenges*, includes reviewed papers presented in June 2016 at the 10th EAAE ARCC International Conference, which was held at the facilities of the Faculty of Architecture of the University of Lisbon. The papers have been further divided into the following five sub-themes: a) Changing Society In Transit; b) Global Migration; c) Renaturalization of the City; d) Emerging Fields of Architectural Practice; and e) Research on Architectural Education. The EAAE ARCC International Conference, held under the aegis of the EAAE and of the ARCC, is a conference organized every other year in collaboration with one of the member schools/universities of those associations, alternatively in North America or in Europe.

Architectural Epidemiology Adele Houghton, Carlos Castillo-Salgado, 2025-05-06. How to create healthier, sustainable, and resilient communities using place-based design strategies. In a world where real estate development often overlooks the critical link between our built environment and public health, architectural epidemiology has emerged as a groundbreaking field that reimagines how to design, build, and inhabit our spaces. Adele Houghton and Carlos Castillo-Salgado bridge the gap between two disparate fields to propose a new transdisciplinary approach aimed at fostering community and planetary health. Architectural Epidemiology leverages building design, renovation, and operations to improve health outcomes among building occupants and in the surrounding community. Drawing from both environmental and applied social epidemiology, this novel approach deploys a problem-solving methodology to identify evidence-based strategies in building design and operations that could lead to positive or negative health outcomes by reducing exposure to environmental hazards and promoting healthy behaviors. The authors illustrate how thoughtful, place-based design can mitigate the adverse effects of climate change, chronic diseases, and other public health challenges. Real-world examples from diverse settings demonstrate the practical application of architectural epidemiology and its impacts on community and planetary health. Practical tools and infographics translate

complex scientific data into actionable design strategies helping professionals from various disciplines collaborate effectively. The principles and applications of architectural epidemiology can drive meaningful action on climate change, sustainable development, and environmental justice while improving public health outcomes and transforming our built environment into a healthier, more equitable world.

Architectural Research Addressing Societal Challenges Volume 1 Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Susana Couceiro da Costa, Joana Pestana Lages, 2017-09-19. The EAAE ARCC International Conference, held under the aegis of the EAAE European Association for Architectural Education and of the ARCC Architectural Research Centers Consortium, is a conference organized every other year in collaboration with one of the member schools/universities of those associations, alternatively in North America or in Europe. The EAAE ARCC Conferences began at the North Carolina State University College of Design, Raleigh, with a conference on Research in Design Education in 1998, followed by conferences in Paris (2000), Montreal (2002), Dublin (2004), Philadelphia (2006), Copenhagen (2008), Washington (2010), Milan (2012), and Honolulu (2014). The conference discussions focus on research experiences in the field of architecture and architectural education, providing a critical forum for the dissemination and engagement of current ideas from around the world.
