Rethinking Copyright for Sustainable Human Development Sileshi Bedasie Hirko,2021-11-25 This book explores

the interface between copyright and higher education and their complementarities for the advancement of sustainable human development In its broader sense the concept of human development is noted as a set of freedoms and human capabilities that are essential for human flourishing Adopting a rights based human development and capability approach HDCA this book primarily examines the relevant policy and legal flexibilities under the existing international copyright system and their implications for access to knowledge required for creative innovation and higher education Exploring the interfaces between copyright and higher education this book argues that an unbalanced and restrictive copyright system impedes reasonable access to knowledge and stifles creative and learning freedoms or capabilities In effect a restrictive copyright system results in serious ramifications for sustainable human development In view of its findings this book underscores the need for rethinking copyright and reframing its relevant flexibilities as users rights that are vital for promoting creative and learning capabilities towards sustainable human development Further the book emphasizes the complementarities between copyright and higher education and their joint roles for sustainable human development Given its application of the HDCA to explore ranges of interlinked topics this book will be of a great interest to researchers across the fields of intellectual property law innovation global development human rights and higher education [Human Development Report](#) ,2002 **Development Policy as a Way to Manage Climate Change Risks** Bert Metz,M Kok J T,2015-02-13 Chapter 1 Introduction the relation between development and climate change chapter 6 Conclusions chapter Note References chapter 1 Introduction chapter Notes chapter 1 Introduction chapter 2 How much aid goes to climate sensitive activities chapter 200 chapter 1 Introduction chapter References chapter 1 Introduction chapter 2 Energy and climate change **Why Some Development Works** Meera Tiwari,2021-08-12 Why do some development projects succeed where others fail This book looks at some macro and some less known micro success stories and considers what enabled them to bring change in some of the world s most deprived communities Using case studies from ten countries across Latin America Africa and Asia Tiwari s innovative approach offers a multi layered understanding of poverty which provides insights into causal enabling and impeding factors While a macro level analysis of development is a common feature of the current literature there has been little attempt to develop a micro level understanding of development at the grassroots Tiwari s work fills this important gap while drawing attention to the importance of engaging local actors at an individual collective and state level demonstrating how achieving a convergence of goals among all actors is a crucial component to a development project s success Looking beyond the case studies to consider how this unique convergence framework might be usefully applied to other contexts the book has profound implications for how we view fragile states and conflict zones and the ability of the international agencies to take effective action A unique study based on extensive empirical research Why Some Development Works will make essential reading for students and researchers studying international development across the social sciences as well as humanitarian and development practitioners and policy makers [Development as a Human Right](#)

Blau, Alberto Moncada, 2007 Much has been written about growing global disparities in wealth and resources how global capitalism has adversely affected human populations and the environment and the dangers that a unipolar world order poses to peace and global pluralism After summarizing the evidence for these arguments the authors develop two main themes first that there is a growing transformative peoples movement that challenges global capitalism and the imperial superpower and second there is an extraordinary worldwide shift underway in human consciousness that accompanies practical global interdependencies and connectedness The authors provide evidence for an emerging foundation of what philosopher Peter Singer describes as a one world ethic and they show how this ethic is closely connected with what is called the human rights revolution They compare the western liberal conception of freedom with conceptions of freedom found in the writings of Jean Paul Sartre and Amartya Sen and draw from Hannah Arendt's *The Human Condition* to clarify that freedom has both collective and individual dimensions They build on these foundations to address the following topics positive human rights collective goods cosmopolitanism social and cultural pluralism and they pose alternatives to capitalism and liberal democracy The authors work in the tradition of critical social science but go beyond that to encourage readers to engage in emancipatory projects and utopian thinking The worlds peoples face too many terrifying prospects not to engage such projects and thinking **Key Thinkers on Space and Place** Phil Hubbard, Rob Kitchin, Gill Valentine, 2004-05-25 A comprehensive guide to the latest work on space Each entry is a short interpretative essay outlining the contributions made by the key theorists
