Instrumentation & Control Systems, 1994-07 Books in Print, 1994 *The Art of Computer Programming* Donald Ervin Knuth, 2005 This fascicle introduces what will become by far the longest chapter in *The Art of Computer Programming* a chapter on combinatorial algorithms that will itself fill three full sized volumes Combinatorial algorithms informally are techniques for

the high speed manipulation of extremely large quantities of objects such as permutations or the elements of graphs
Combinatorial patterns or arrangements solve vast numbers of practical problems and modern approaches to dealing with
them often lead to methods that are more than a thousand times faster than the straightforward procedures of yesteryear
This fascicle primes the pump for everything that follows in the chapter discussing first the essential ideas of combinatorics
and then introducing fundamental ideas for dealing efficiently with 0s and 1s inside a machine including Boolean basics and
Boolean function evaluation As always the author s exposition is enhanced by hundreds of new exercises arranged carefully
for self instruction together with detailed answers
