In recent years information and communication technology has immensely change consumer behavior and this has greatly impacted on the way businesses communicate with their customers. The speedy advancement in technology has necessitated business organizations to embrace the changing trends by incorporating information technology in their activities. Based Hull 2004 ideas the innovations on the Internet have transformed the way people communicate search information and carryout business operation. As a result business organizations have been left with no option other than embracing the new trends by integrating new information technologies in their systems. In this regard digital marketing has not only become an effective marketing strategy but also necessary in the light of the changing consumer behaviour towards digitization and online experiences. A digital marketing strategy for Bank365 Group, 2024-02-14 Seminar paper from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 65 course Digital Marketing language English abstract The rise of digital technologies has allowed customers to take a better informed purchasing decision by comparing prices quality and reading product reviews on the web. Power today is in the consumers hands. Having gone through a shift from the age of identity the age of value and the age of experiences brands are now looking towards making business a personal experience. Bearing this in mind Bank365's website shouldn't just act as a contact card or a centralised collection of

information about its products or services but rather should play a central role in a seamless digital user brand experience. Having a cycle in place of knowing what customers are looking for when they land on Bank365.com and giving that to them, measuring user behaviour and aligning business KPIs, turning passive browsers into valuable conversions and defending against limited visitor patience are all activities which the Bank should focus on if it expects any improved results from the digital environment. Bank365 undergoes the cycle of reaching, acting, converting and engaging online with customers on a daily basis. When done right, this has produced results and as a matter of fact, the company has been generating an average of 165 online leads per month around 2000 online requests/forms filled per year since January 2015. Nevertheless, the aspiration to have a better integrated digital marketing strategy can no longer be put aside. Conversion rate optimisation (CRO) is a free approach to digital marketing focusing on inbound traffic which, if adopted, will allow for lower acquisition costs and maximisation of profits, therefore more money to spend on additional acquisitions. Through CRO, Bank365 will get more of the right kind of customers, add value to affiliations and business partners, combat the limited attention span of the average website visitor and generate momentum by having an edge on its competitors. The Bank's website is a constant work in progress, hence there will always be room for improvement.
