Contemporary Developments in High-Frequency Photonic Devices Bhattacharyya, Siddhartha, Debnath, Pampa, Deyasi, Arpan, Dey, Nilanjan, 2019-06-14. Microwave photonics and information optics provide high bandwidth and precision along with ultrafast speed at a low cost. In order to reduce noise at the communication transceivers, scattering in the devices needs to be decreased, which can be achieved by replacing optoelectronic devices with photonic devices because in the latter only photons propagate electromagnetic waves. *Contemporary Developments in High Frequency Photonic Devices* is a crucial research book that examines high frequency photonics and their applications in communication engineering. Featuring coverage on a wide range of topics such as metamaterials, optoelectronic devices, and plasmonics, this book is excellent for students, researchers, engineers, and professionals.

Microwave Engineering with Wireless Applications S. R. Pennock, P. R. Shepherd, 1998. As the radio frequency is quickly filling with wireless services, mobile communication applications have turned to microwaves. Here is the fundamental guide to both basic microwave engineering principles and the latest wireless applications. The book fully explains the connection between microwaves and wireless technologies, providing convenient one-volume coverage of communications, radar, and antenna applications.
