Advances in Manufacturing Engineering Mithilesh K. Dikshit, Ashish Soni, J. Paulo Davim, 2022-08-29 This book presents select peer reviewed proceedings of the International Conference on Futuristic Advancements in Materials Manufacturing and Thermal Sciences ICFAMMT 2022 The contents of this book provide an overview of the latest research in the area of manufacturing sciences such as metal cutting metal forming casting joining micromachining nonconventional machining and additive manufacturing Some of the other themes covered in this book are metal based additive manufacturing polymer based additive manufacturing hybrid additive manufacturing optimization approach for minimizing GD and error in additive manufactured parts The book will be useful for researchers and professionals working in the field of manufacturing engineering

Subsea Pipeline Design, Analysis, and Installation Qiang Bai, Yong Bai, 2014-02-18 As deepwater wells are drilled to greater depths pipeline engineers and designers are confronted with new problems such as water depth weather conditions ocean currents equipment reliability and well accessibility Subsea Pipeline Design Analysis and Installation is based on the authors 30 years of experience in offshore The authors provide rigorous coverage of the entire spectrum of subjects in the discipline from pipe installation and routing selection and planning to design construction and installation of pipelines in some of the harshest underwater environments around the world All inclusive this must have handbook covers the latest breakthroughs in subjects such as corrosion prevention pipeline inspection and welding while offering an easy to understand guide to new design codes currently followed in the United States United Kingdom Norway and other countries Gain expert coverage of international design codes Understand how to design pipelines and risers for today s deepwater oil and gas Master critical equipment such as subsea control systems and pressure piping

Advances in Computer Science for Engineering and Education III Zhengbing Hu, Sergey Petoukhov, Ivan Dychka, Matthew He, 2020-08-05 This book comprises high quality refereed research papers presented at the Third International Conference on Computer Science Engineering and Education Applications ICCSEEA2020 held in Kyiv Ukraine on 21 22 January 2020 organized jointly by National Technical University of Ukraine Igor Sikorsky Kyiv Polytechnic Institute National Aviation University and the International Research Association of Modern Education and Computer Science The topics discussed in the book include state of the art papers in computer science artificial intelligence engineering techniques genetic coding systems deep learning with its medical applications and knowledge representation with its applications in education It is an excellent source of references for researchers graduate students engineers management practitioners and undergraduate students interested in computer science and their applications in engineering and education

Mechanical Design and Simulation: Exploring Innovations for the Future Duc Truong Pham, Yaguo Lei, Yanshan Lou, 2025-01-23 This book is an open access publication This book presents innovative strategies and cutting edge research at the intersection of mechanical engineering and simulation technologies Aimed at addressing the current challenges and limitations in mechanical design this book

presents an array of advanced methodologies and tools that promise to revolutionize the field From integrating artificial intelligence and machine learning for design optimization to leveraging the latest in finite element analysis for enhanced stress modelling the proceedings highlight the pivotal role of simulation in pushing the boundaries of what is possible in mechanical design With a strong emphasis on sustainable design practices and the utilization of additive manufacturing this collection not only serves as an indispensable resource for engineers researchers and students but also marks a significant step forward in bridging the gap between traditional mechanical design principles and modern computational innovations

Simulating Fatigue Crack Growth in Spiral Bevel Pinion ,2003 New results for predicting crack trajectory and fatigue life for a spiral bevel pinion using the Finite Element Method FEM are reported The predictions presented are based on linear elastic fracture mechanics combined with the FEM incorporating plasticity induced fatigue crack closure and moving gear tooth loads The analyses were carried out using a parallel FEM solver which calculates stress intensity factors using equivalent domain J integral method Fatigue life predictions were made based on a modified Paris model incorporating crack closure To obtain a more detailed understanding of the contact between a cracked pinion tooth in mesh with an uncracked gear tooth three dimensional contact analyses were performed on a spiral bevel gear set incorporating a crack The goal in carrying out these analyses was to capture the redistribution of contact loads due to crack growth Results of these analyses showed the expected trend of decreasing tooth loads carried by the cracked tooth with increasing crack length It was also showed that this decrease in contact loads had an impact on the stress intensity factor values and therefore would also affect the crack trajectory and fatigue life predictions **Power Transmissions** George

Dobre,2013-07-11 This books contains the Proceedings of the 4th International Conference on Power Transmissions that was held in Sinaia Romania from June 20 23 2012 Power Transmissions is a very complex and multi disciplinary scientific field of Mechanical Engineering that covers the different types of transmissions mechanical hydraulic pneumatic as well as all the machine elements involved such as gears bearings shafts couplings and a lot more It concerns not only their basic theory but also their design analysis testing application and maintenance The requirements set to modern power transmissions are really tough to meet They need to be more efficient stronger smaller noiseless easier to produce and to cost less There is a strong demand to become easier in operation and maintenance or even automatic and in maintenance free Last but not least they should be easily recycled and respect the environment Joint efforts of specialists from both academia and industry can significantly contribute to fulfill these needs The main goal of this conference was to bring together experts from all over the world and present the latest developments in the field of Power Transmissions [2013 International Conference on](#)
