What does professionalism mean for teachers and trainers in further education colleges or adult education centres Over the last twenty years ideas about professionalism and professional identity within the post compulsory sector have been shaped and reshaped by successive policies standards and professional bodies Yet these ideas themselves remain controversial and continue to be the focus of debate as well as research This book gathers together a series of articles published over the last ten years providing critical and research based perspectives on professionalism within post compulsory education and training The twelve chapters that are presented here explore issues such as professional standards and continuing professional development and their impact on current definitions and frameworks of professionalism as well as the policies that have shaped these processes These are issues that are of relevance and importance not only to practitioners and researchers in the post compulsory sector but to anyone who is concerned with contemporary debates about what it means to be a professional in education and training The chapters in this book were originally published as articles in *Research in Post Compulsory Education* *Guidance on the Inspection of Secondary Schools* ,1995 *Making School Work* Andy Buck,2007

Sets out a range of strategies for successful school leadership This work answers some of the key challenges facing school leaders Inspecting Schools Brian Wilcox,John Gray,1996 During the first half of the 1990s the British government turned inspection into an ambitious instrument of educational policy making Initially it encouraged local education authorities to experiment with inspection in all its forms Growing impatient with the pace of change however a new policy was brought into force after the 1992 General Election Schools were to be inspected on a hitherto unprecedented scale Every primary and secondary school in England and Wales was to undergo a full inspection once every four years At the same time a new agency the Office for Standards in Education OFSTED was set up to organize the new programme Their concern they declared was not merely to hold schools to account but to help them to improve So called failing schools in particular would be identified and put on notice to change The research reported here is one of the very first independent attempts to explore the aftermath of inspection and the ways in which schools do or don't take up inspectors challenges What kinds of recommendations do schools find relatively easy to implement Which factors seem to make a difference Do so called failing schools require special treatment In short has a powerful tool for school improvement been discovered Or is its leverage on change processes in practice more modest The history of school inspections in Britain stretches back over 150 years Despite this lengthy tradition its effects have up till now been simply asserted or taken for granted *Inspecting Schools* offers a compelling account of the limits and possibilities of inspection as a mechanism for school reform
