Mega Construction Projects Using Stakeholder Management:

Fundamental Theories of Mega Infrastructure Construction Management Zhaohan Sheng, 2017-10-20 Fundamental Theories of Mega Infrastructure Construction Management Theoretical Considerations from Chinese Practices is a collection of decades of research and applications of managing megaprojects using theories of complex systems and management sciences It presents basic classical theory of megaproject management and is a showcase of more than 30 years of research of complex system and management sciences on the theory of megaproject management resulting from the integrating of theory and practice of megaprojects The theory and models have undergone rigorous systematic testing during the management and implementation of megaprojects in China Megaprojects are huge undertakings often in infrastructure bridges tunnels airports etc that involve huge levels of investment often take years to complete and typically run into delays cost overruns and any number of unforeseen problems Over the last few decades no one country has undertaken more of these projects than China and this book presents the fundamental theories underlying the practice of Mega Infrastructure Construction Management as practiced in China Individual chapters provide a basic definition of Mega Infrastructure Construction and its management an overview of the theories behind it the Formation Path basic concepts fundamental principles scientific problems the Method System of Meta synthesis specialized methods in research and intelligent management of Mega Infrastructure Construction Although the theoretical construction management problems in this book are derived from construction practices in China they can be applied universally and extended for great fundamental significance

Sustainable Management of Transnational Megaprojects Dario Cottafava, Daniel Torchia, Stefania Camoletto, Laura Corazza, 2024-04-04 This book analyses the seminal role of megaprojects for sustainable development and the related complex challenges they bring It provides insights into the growing social responsibilities that megaprojects have not only to be environmentally sustainable but also towards the multitude of stakeholders involved whether directly or indirectly After an historical overview of the increasingly necessary links between sustainable infrastructure and megaprojects the book builds on and applies stakeholder theory to stakeholder engagement and management in megaprojects It also emphasizes the importance of building impact assessment frameworks that consider the unheard voices that are often passively sitting at the receiving end of a megaproject as well as the local context where the megaproject is embedded The book then proceeds to analyse the case of a very contested transnational railway megaproject between Italy and France the Turin Lyon high speed railway which has been suffering from stakeholder and communication issues for over thirty years as well as from notable managerial and legal differences in the two countries In this way the book informs both theory and practice and encourages scholarly interventions into wicked problems It contains a comprehensive review of the academic literature on the sustainability sustainability challenges and sustainability reporting of megaprojects Conceptual models frameworks and future research opportunities are provided to clarify the empirical challenges and highlight the gaps

and opportunities to be explored by researchers and practitioners in future The audience for the book is both academic researchers and practitioners in the field of megaprojects and more specifically those dealing with managing transnational megaprojects It also includes several topics that will be of interest to policy and decision makers *Construction Project Monitoring and Evaluation* Callistus Tengan, Clinton Aigbavboa, Wellington Didibhuku Thwala, 2021-04-27 This book will provide readers with an in depth theoretical awareness and practical guidance on the implementation of an effective monitoring and evaluation M E system to ensure construction projects meet approved quality cost time and social sustainability objectives The authors discuss the drivers challenges determinants and benefits of effective M E implementation together with the theories and models underpinning construction project M E practices Further a comparative overview of M E practices in developed and developing countries is presented to elucidate the best practices The book first conceptualizes M E as a five factor model comprising stakeholder involvement budgetary allocation and logistics technical capacity and training leadership and communication It then presents an M E case study on the Ghanaian construction industry before expanding on the idea of M E systems as an effective tool for project performance and in optimizing a project s contribution to society and the environment The book further provides guidance on M E practice for construction project managers investors professionals researchers and other stakeholders and is therefore of interest to those in architecture construction engineering planning project management and development studies **The Construction Industry in the Fourth Industrial Revolution** Clinton Aigbavboa, Wellington Thwala, 2019-08-09 This book gathers papers from the 11th Construction Industry Development Board cidb Postgraduate Research Conference held on 28 30 July 2019 in Johannesburg South Africa The conference provided an essential forum for reviewing and generating knowledge on Construction 4 0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation The event addressed three broad themes Industrial production prefabrication 3 D printing and assembly offsite and advanced manufacturing Cyber physical systems actuators sensors IoT robots and cobots for repetitive and dangerous tasks and drones for mapping progress monitoring safety and quality inspections lifting moving and positioning and Technologies digital ecosystems digital platforms BIM video and laser scanning AI and cloud computing big data and data analytics reality capture blockchain simulation virtual and augmented reality data standards and interoperability and vertical and horizontal integration Given its scope the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction **Routledge Handbook on Labour in Construction and Human Settlements** Edmundo Werna, George Ofori, 2023-12-12 Routledge Handbook on Labour in Construction and Human Settlements presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus areas in innovative ways This unrivalled edited

collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry It provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors Underpinning the entire book is the premise that the way the built environment is produced and its main products buildings cities and towns have an impact on large numbers of workers At the same time the quality of the built environment requires construction workers who are well trained and with good working conditions While cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed Those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards In addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed This book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management

BUiD Doctoral Research Conference 2024 Khalid Al Marri, Farzana Asad Mir, Ahmed Awad, Ahmed Abubakar, 2025-05-16 This book presents selected contributions on a wide range of scientific and technological areas originating from the BUiD Doctoral Research Conference BDRC 2024 It discusses the following topics project management macroeconomic factors Fourth Industrial Revolution agility multiculturalism diversity inclusion leadership language discourse analysis curriculum critical thinking programming online learning and natural ventilation The contributions reflect the multifaceted nature of the research in three academic disciplines i e humanities formal science and applied science This publication shares with its readers genuine research studies and reflections from practitioners on the current practice and understanding in the three academic disciplines The significant findings of these studies have considerable educational industrial and economic implications

Carbon neutrality approaches in buildings and agriculture sectors Hongyun Si, Xianbo Zhao, Guangdong Wu, Ge Wang, 2023-02-27 *Application of Partnering for Effective Stakeholder Relationship Management*, 2024

Introduction, Strengths and Weaknesses of Leading Project Management Standards and Frameworks Natalie Zonis, 2011 Seminar paper from the year 2009 in the subject Business economics Business Management Corporate Governance grade 1 3 University of Applied Sciences Berlin language English abstract What do the construction of the Pyramids of Giseh or of the Great Wall of China Hannibal s Alps crossing and the Berlin Airlift have in common These all are examples for famous and inspiring historical projects which would have never been realized without a profound planning execution coordination and control Mankind seems to have a lot of experience coming

from fields like construction engineering and defense on one hand On the other hand we almost daily hear about projects that have failed or haven't met customers expectations and as a result have even ruined whole companies and organizations Every year 75 Billion US Dollars have been spent on failing projects only in IT sector Only 17 percent of all software projects done in the United States meet the original targets 50 percent must have those target changed All that happens today when branches and industries are faced with rough economic and highly competitive environments with an increasing market concentration and fragility which shortens product life cycles and puts very strong requirements to costs and quality To reduce risks of failure to collect knowledge to benefit from own and others experiences and to give guidelines to the project personnel project management was systematically developed as an outstanding discipline with its own standards and guides The emergence and recognition of a distinct profession of project management has certainly been a strong driver in the development of standards and frameworks The need to understand and to specify the role of the project manager himself for a common terminology and the necessity of a common basis for employment and deployment of project personnel working collaboratively across functions in multidisciplinary teams across organizations in st

Project Management Casebook

David I. Cleland, Karen M. Bursic, 1998 How do project team members get the knowledge skills and attitudes needed to perform effectively One proven method is through the case study approach The book offers 50 case studies that represent the breadth and importance of project management and its impact on the everyday management of projects Each of the cases provides new and unique challenges that have been mastered by the practice of project management Readers will be able to apply the knowledge learned from this casebook in their work The cases enable readers to see how and why projects are used in a wide variety of organizational settings in contemporary life Readers are exposed to both successful and not so successful project management practices The case study approach encourages reader participation and active learning and provides the opportunity to learn something of the real world of project management It is essential in the curricula of project management training for both undergraduate and graduate students as well as for continuing education consulting and in house company training programs The cases were chosen for their importance in discussing the fundamentals of project management Most contain descriptions of actual projects and each is followed by a series of questions to guide readers analysis of the article to maximize the learning process
