

Offshore Vessel Inspection Database (OVID)

What is OVID?

The Offshore Vessel Inspection Database (OVID), launched in January 2010, builds on OCIMF's experience with the SIRE programme to offer a system of inspection for offshore support vessels.

OVID provides a web-based inspection tool and database of inspection reports, underpinned by trained and accredited inspectors. This consistent, robust and up-to-date repository of vessel details simplifies vessel assurance for vessel operators, commissioners and government bodies. The Offshore Vessel Management and Self-Assessment (OVMSA) gives operating companies a self-assessment tool for safety management and a framework for the promotion of continuous improvement.

How does it work?

OCIMF member companies commission offshore vessel inspections and appoint an accredited OVID inspector to conduct an inspection. The inspector accesses the vessel particulars from the OVID and the appropriate Offshore Vessel Inspection (OVVQ), Small Craft Inspection (OVVQ Small Craft) or Mobile Offshore Drilling Unit (MODU) Inspection Questionnaires. The inspector conducts an on-board inspection of activities, ranging from several variants to establish the safe operation of the vessel's pollution prevention measures. The inspection report contributes to the member company's risk assessment in advance of charter.

The report is also uploaded to the OVID where, for a nominal fee, it can be accessed by registered companies who charter offshore vessels. OVID reports are free to government agencies engaged in port state control activities.
