Solder Reflow Information

Assembly of a surface mount device depends on many process/material and equipment parameters. Two of the most common processes used are infrared (IR) and convection reflow. Skyworks products come in three different termination finishes, depending on the package.

- Au (Cu/Ni/Au) for MCM and LGA (laminate-based) packages
- SnPb (Sn 70 to 90%, Pb 30 to 10%, 300 to 1,000 micro-inches thick) for lead frame-based solder plated products
- Sn (100% 300 to 1,000 micro-inches thick) or Ni/Pd/Au as a lead (Pb)-free replacement for SnPb

This finish is compatible with all commonly used processes. The most common attachment process is the convection reflow process.

The reflow process requires applying solder and flux in the form of a paste to the areas of the substrate or PC board where the surface mount component connections are to be made. The solder and flux are applied to the circuit by screening, stenciling, or dot placement. This paste acts as a temporary adhesive holding the device in place until reflow soldering takes place. Optionally, a chip-bonding epoxy can be used to hold the device in place.

Solder paste manufacturers generally provide a recommended profile for the specific solder being used. The manufacturer's profile or the typical solder reflow profiles table in this document can be used as a starting point for profiling the process.

Caution: Please contact your solder paste manufacturer for exact solder profile requirements.

When using thermocouples for profiling, it should be noted that the outside edges and corners of an assembly heat up faster than the center, and components of greater thermal mass will heat more slowly than those of lesser thermal mass.

A thermal reflow process profile typically undergoes five transitions:

- 1. Preheat:** Brings the assembly from 25 °C to preheat zone and evaporates solvents from solder paste. A slow ramp-up rate will prevent any damage due to thermal shock. The time and temperature to evaporate the solvents will depend upon the solder paste that is used.
- 2. Flux Activation (Preheat-TL):** Dried solder paste is heated to a temperature in which the flux will react with the oxide and contaminants on the surfaces to be joined. The time and temperature should be long enough to allow the flux to fully clean these surfaces but not too long that the flux may be exhausted before soldering takes place.
- 3. Thermal Equalization (Preheat-TL):** Achieves temperature equalization approximately 20–40 °C below the peak reflow temperature. Time and temperature will depend upon the mass and materials.
- 4. Reflow (TL-TP):** In this stage, the assembly is briefly brought to the temperature sufficient to produce reflow of solder.
- 5. Cool Down:** This is the final stage in the solder process. Gradual cooling should be used. The end result should be as fast as possible without causing thermal shock to the components. Cool down in this manner will produce a finer grain structure in the solder joint, which will yield a more fatigue-resistant solder joint.

Application Note Solder Reflow Information Skyworks:

Reflow Soldering Processes Ning-Cheng Lee, 2002-01-11 Focused on technological innovations in the field of electronics packaging and production this book elucidates the changes in reflow soldering processes its impact on defect mechanisms and accordingly the troubleshooting techniques during these processes in a variety of board types Geared toward electronics manufacturing process engineers design engineers as well as students in process engineering classes Reflow Soldering Processes and Troubleshooting will be a strong contender in the continuing skill development market for manufacturing personnel Written using a very practical hands on approach Reflow Soldering Processes and Troubleshooting provides the means for engineers to increase their understanding of the principles of soldering flux and solder paste technology The author facilitates learning about other essential topics such as area array packages including BGA CSP and FC designs bumping technique assembly and rework process and provides an increased understanding of the reliability failure modes of soldered SMT components With cost effectiveness foremost in mind this book is designed to troubleshoot errors or problems before boards go into the manufacturing process saving time and money on the front end The author s vast expertise and knowledge ensure that coverage of topics is expertly researched written and organized to best meet the needs of manufacturing process engineers students practitioners and anyone with a desire to learn more about reflow soldering processes Comprehensive and indispensable this book will prove a perfect training and reference tool that readers will find invaluable Provides engineers the cutting edge technology in a rapidly changing field Offers in depth coverage of the principles of soldering flux solder paste technology area array packages including BGA CSP and FC designs bumping technique assembly and the rework process

The book delves into Application Note Solder Reflow Information Skyworks. Application Note Solder Reflow Information Skyworks is an essential topic that must be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Application Note Solder Reflow Information Skyworks, encompassing both the fundamentals and more intricate discussions.

1. The book is structured into several chapters, namely:
 - Chapter 1: Introduction to Application Note Solder Reflow Information Skyworks
 - Chapter 2: Essential Elements of Application Note Solder Reflow Information Skyworks
 - Chapter 3: Application Note Solder Reflow Information Skyworks in Everyday Life
 - Chapter 4: Application Note Solder Reflow Information Skyworks in Specific Contexts
 - Chapter 5: Conclusion
 2. In chapter 1, the author will provide an overview of Application Note Solder Reflow Information Skyworks. This chapter will explore what Application Note Solder Reflow Information Skyworks is, why Application Note Solder Reflow Information Skyworks is vital, and how to effectively learn about Application Note Solder Reflow Information Skyworks.
 3. In chapter 2, the author will delve into the foundational concepts of Application Note Solder Reflow Information Skyworks. The second chapter will elucidate the essential principles that must be understood to grasp Application Note Solder Reflow Information Skyworks in its entirety.
 4. In chapter 3, this book will examine the practical applications of Application Note Solder Reflow Information Skyworks in daily life. The third chapter will showcase real-world examples of how Application Note Solder Reflow Information Skyworks can be effectively utilized in everyday scenarios.
 5. In chapter 4, this book will scrutinize the relevance of Application Note Solder Reflow Information Skyworks in specific contexts. The fourth chapter will explore how Application Note Solder Reflow Information Skyworks is applied in specialized fields, such as education, business, and technology.
 6. In chapter 5, this book will draw a conclusion about Application Note Solder Reflow Information Skyworks. The final chapter will summarize the key points that have been discussed throughout the book.
- This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. It is highly recommended for anyone seeking to gain a comprehensive understanding of Application Note Solder Reflow Information Skyworks.
